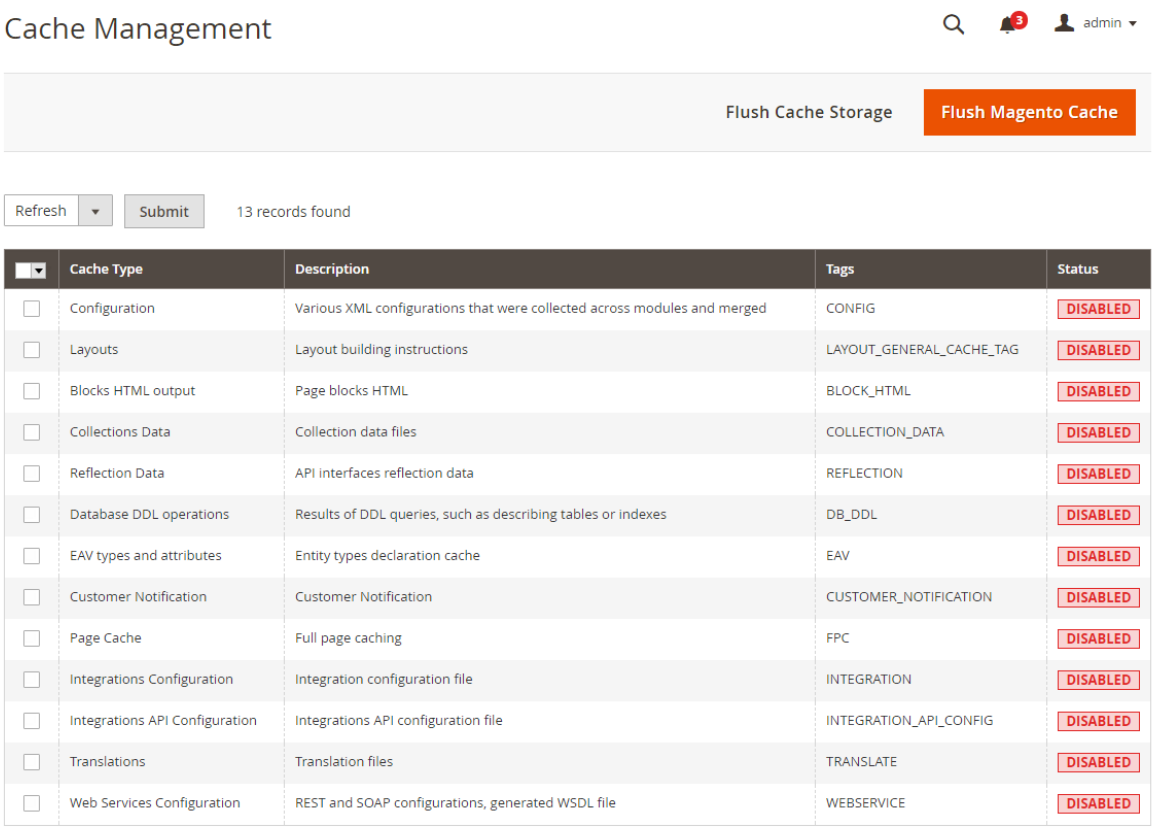
PRE-INSTALLTION

Go to **Admin → SYSTEM → Tools → Cache Management**, select all caches, click "Disable" from the drop down menu and submit the changes.



You also should run the Magento in developer mode when you're extending or customizing it. You can use this command line to show current mode:

```
php bin/magento deploy:mode:show
```

Use this command to change to developer mode:

```
php bin/magento deploy:mode:set developer
```

Please refer below link for how to set magento mode.

http://devdocs.magento.com/guides/v2.2/config-guide/cli/config-cli-subcommands-mode.html

INSTALLATION STEPS

Module Purchased from MageBees:

Install Using Web Wizard Setup:

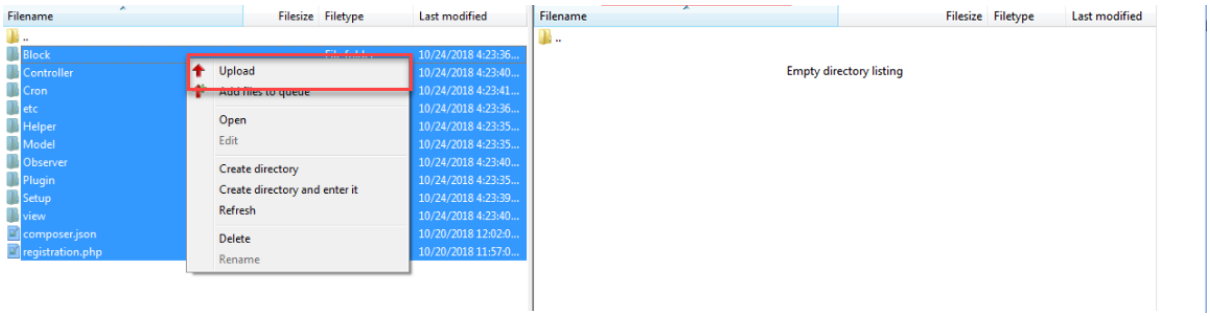
1. Download Zip files from Magebees Account and Upload Files on Your Magento Server.

   ⇨ Unpack the contents of the "**Magebees_AbandonedCart-[redacted].zip**" folder that you have downloaded.

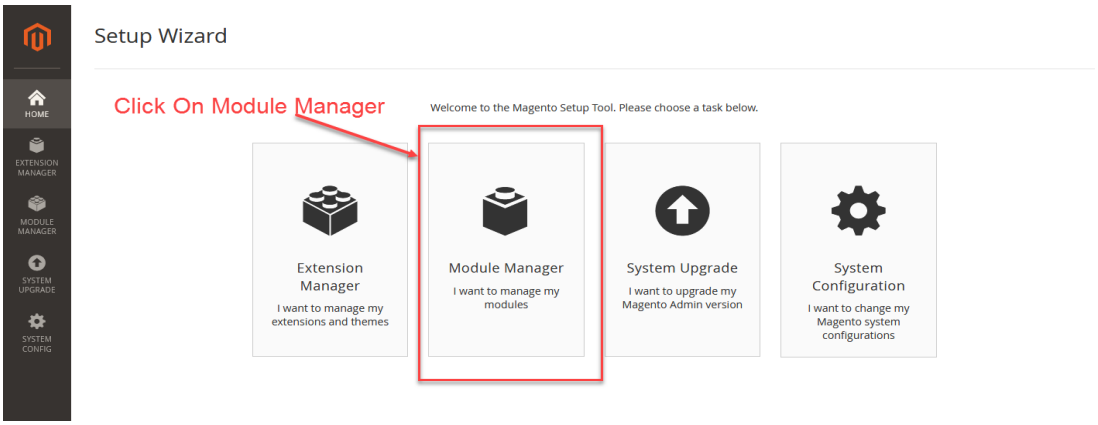
   ⇨ Create "**Magebees"** folder in your <**magento root directory>/app/code** directory, if "**Magebees"** Folder not exist.

   ⇨ Create "**AbandonedCart"** folder in your <**magento root directory>/app/code/Magebees** directory.

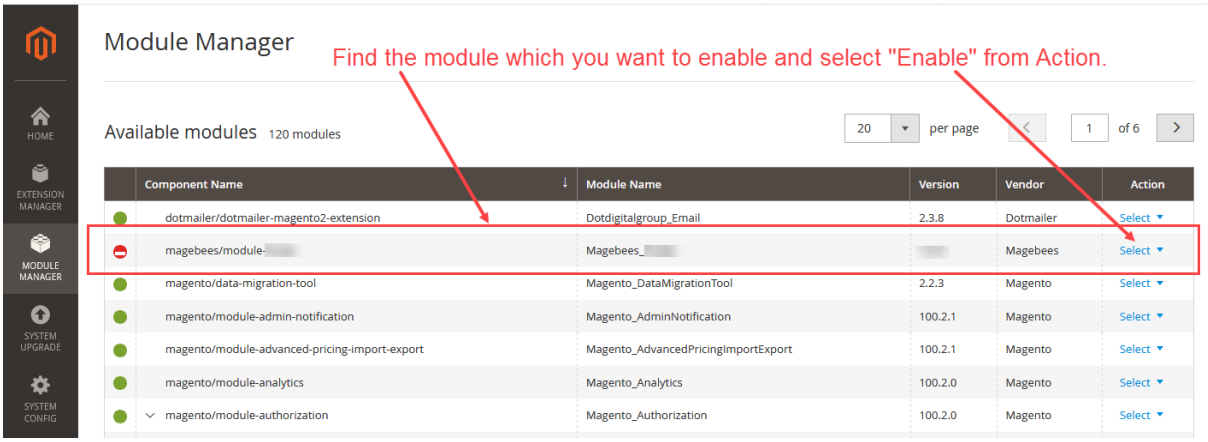
   ⇨ Select the content of **"Magebees_AbandonedCart"** folder in your **<magento directory>/app/code/Magebees/AbandonedCart** directory and follow the below mentioned step.



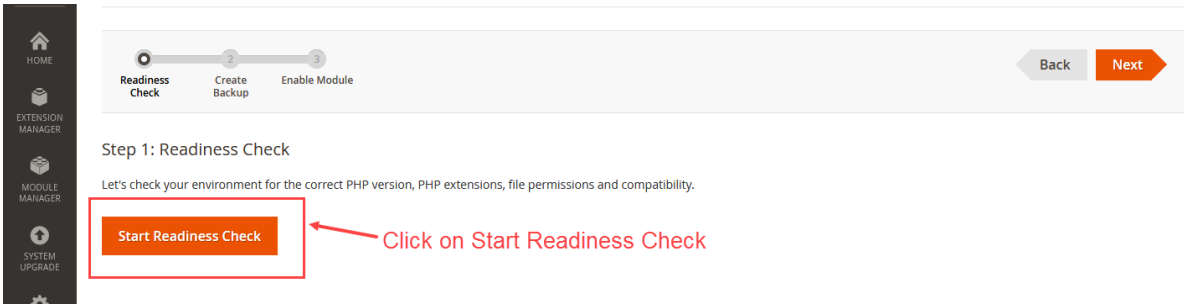
2. Go to **SYSTEM → Tools → Web Wizard Setup.** Click on 'Module Manager'.



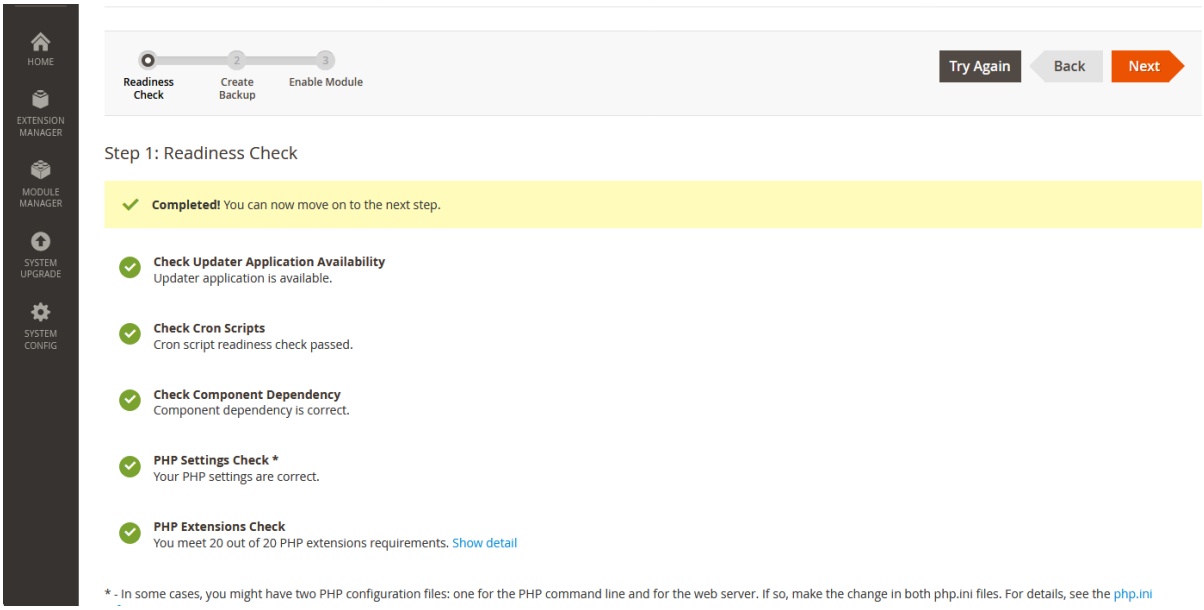
3. In 'Module Manager' section you will find all available modules list. Using Action drop-down you can enable/disable module.



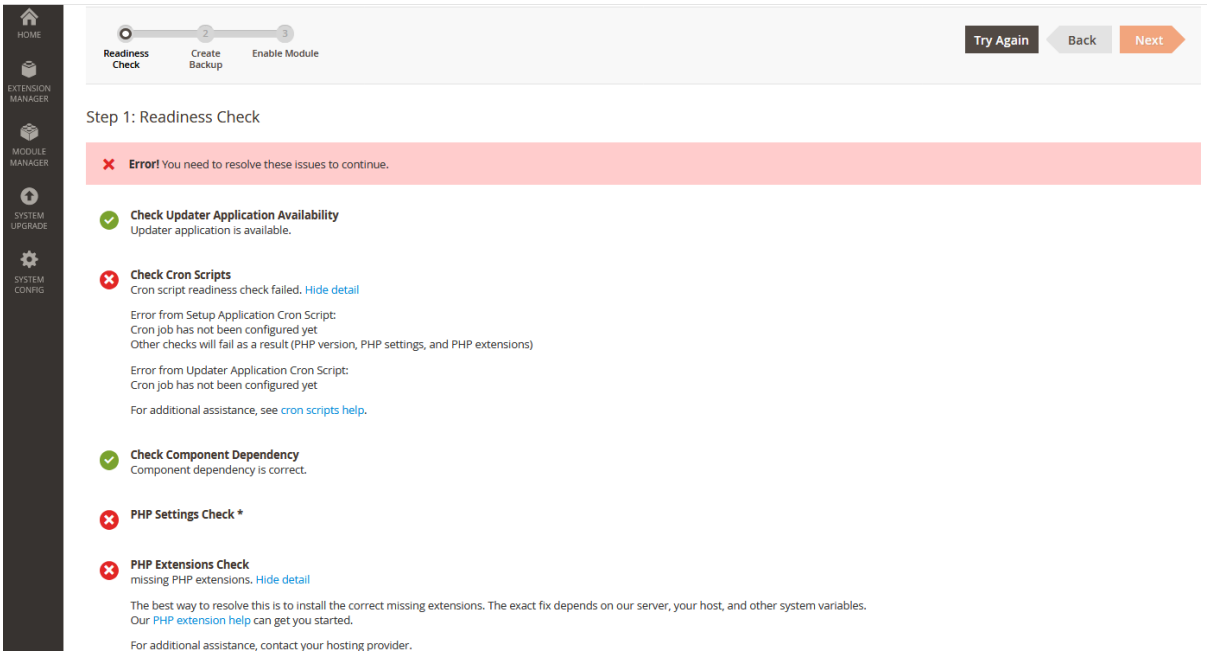
4. Run readiness check.



- Readiness Check Success:



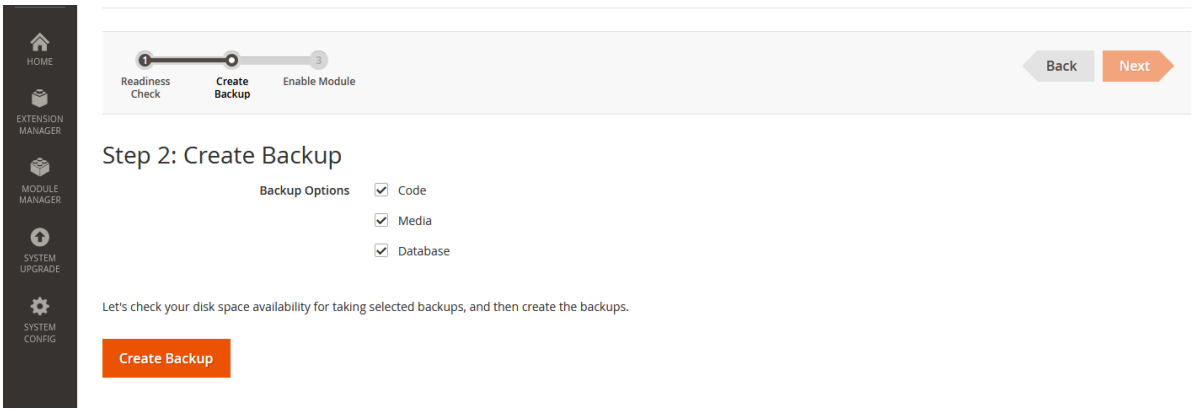
- Readiness Check Failure:



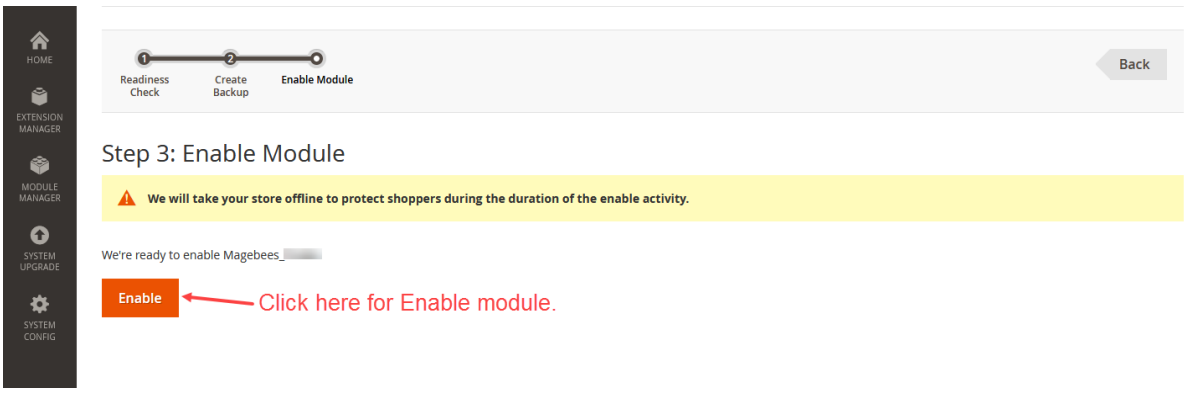
- *Please check your system configuration with magento stack technology requirements.*
    - *http://devdocs.magento.com/guides/v2.2/install-gde/system-requirements-tech.html*

- *Please make sure you have configured cron job for magento properly.*
    - *Here you'll find the information on how to set up the cron job for Magento.*

5. If you want to take backup before install module then select "Create Backup" option.

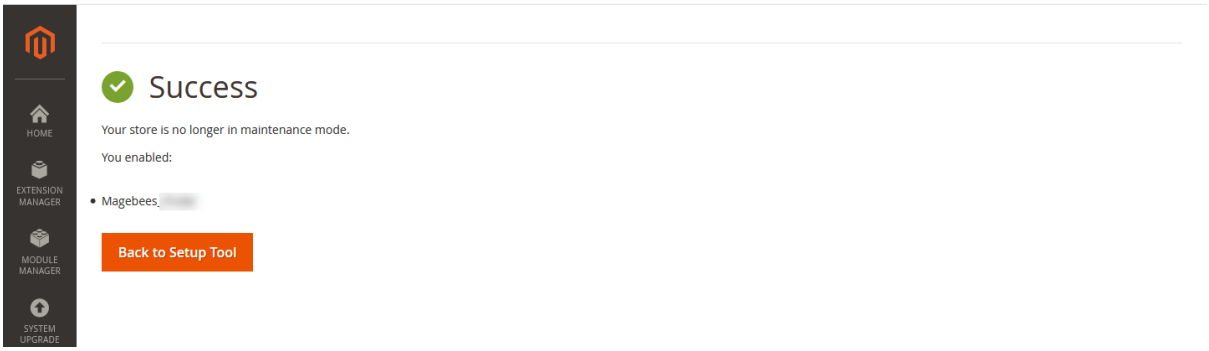


6. Enable the module. The installation process takes a couple of minutes.



When you click on Enable module, it will redirect to process extensions section.

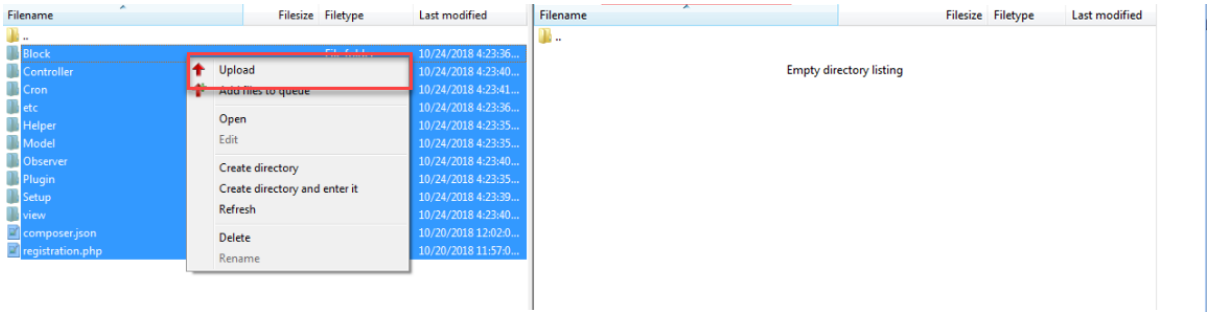
7. After the installation is complete, you'll see the success page.



Install Using SSH:

Download Zip files from Magebees Account and Upload Files on Your Magento Server.

- ⇨ Unpack the contents of the "**Magebees_AbandonedCart -[redacted].zip**" folder that you have downloaded.
- ⇨ Create "**Magebees"** folder in your <**magento root directory>/app/code** directory, if "**Magebees"** Folder not exist.
- ⇨ Create "**AbandonedCart"** folder in your <**magento root directory>/app/code/Magebees** directory.
- ⇨ Select the content of **"Magebees_AbandonedCart"** folder in your **<magento directory>/app/code/Magebees/AbandonedCart** directory and follow the below mentioned step.



- ⇨ Open command prompt /terminal and change directory to your magento install directory.
- ⇨ Run following command :

```
php bin/magento module:enable Magebees_AbandonedCart
```

```
php bin/magento setup:upgrade
```

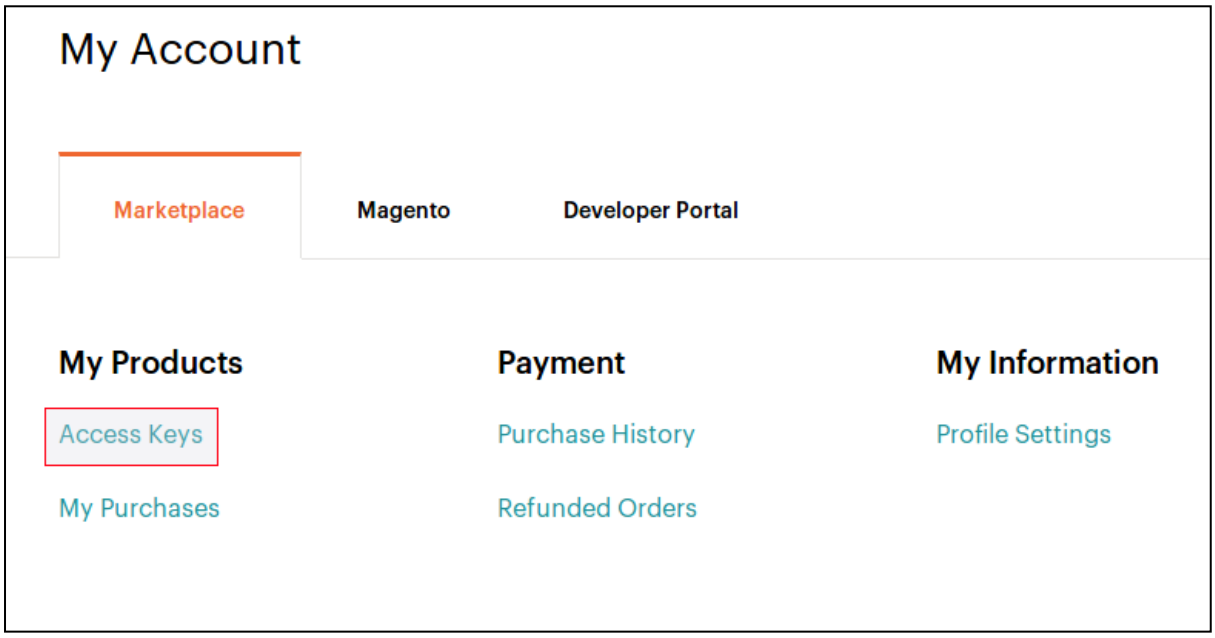
```
rm -R pub/static/*
```

```
php bin/magento setup:static-content:deploy
```

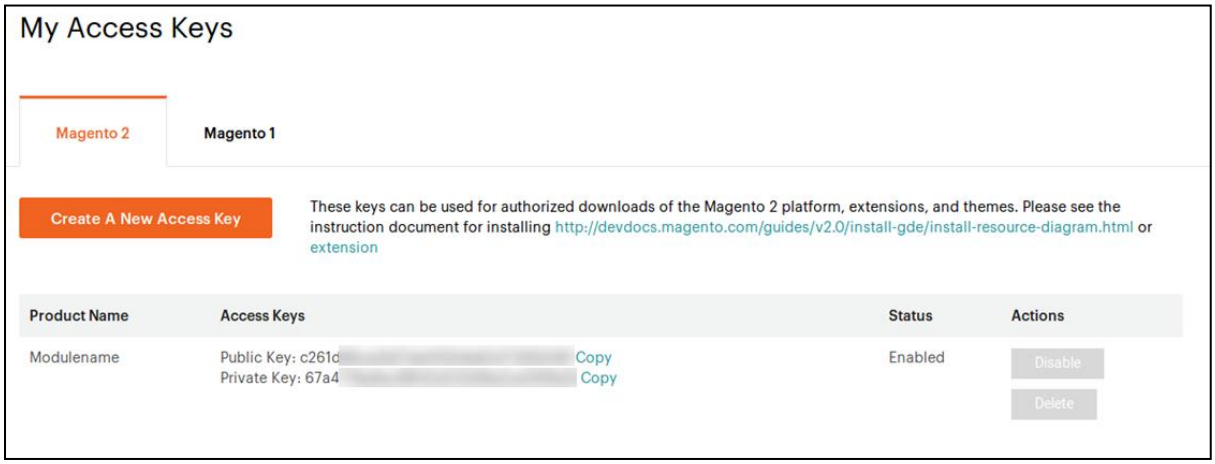
- ⇨ Go to **Admin → SYSTEM → Tools → Cache Management**.
- ⇨ Select all caches, click on "**refresh**" from the drop down menu and submit the changes.

Module Purchased from Magento Marketplace:

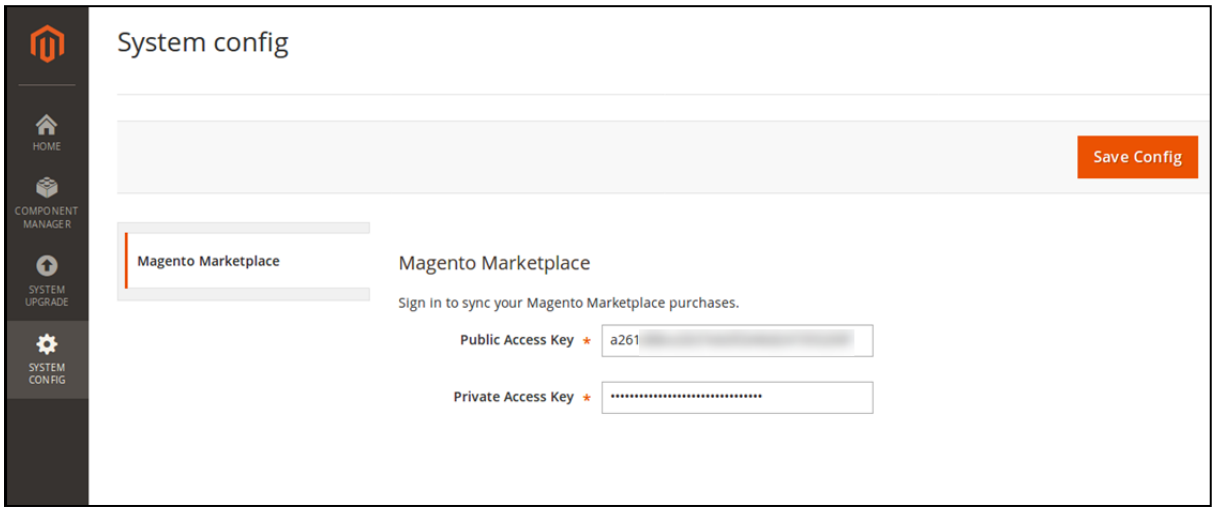
1. Login Into your market place account.
2. Open the 'My Access Keys' page from "My Profile".



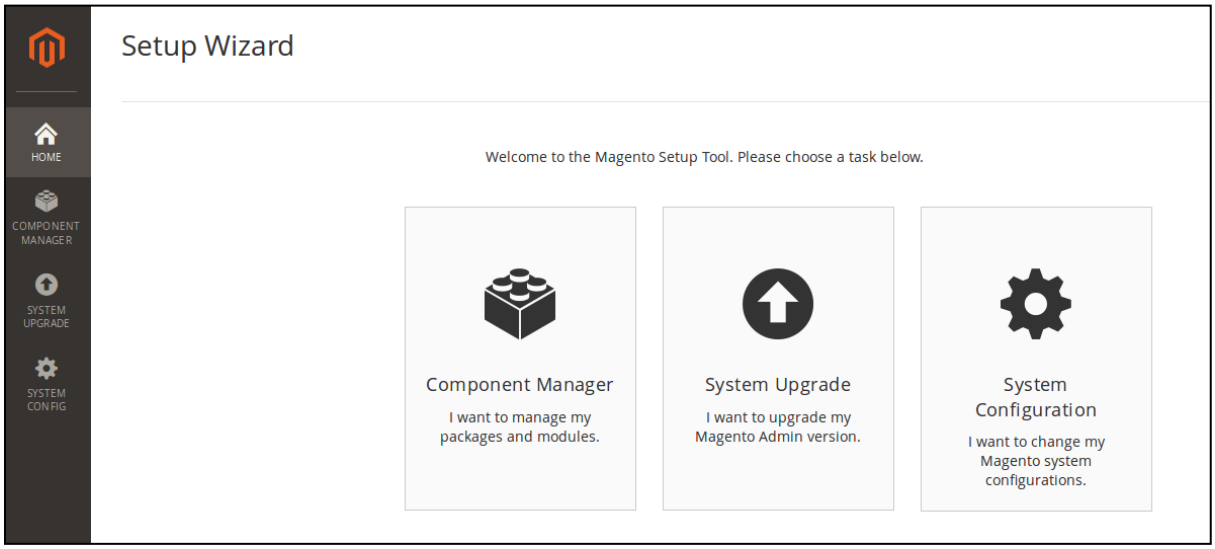
3. Click on the '**Access Keys**' button and the keys will be generated automatically.



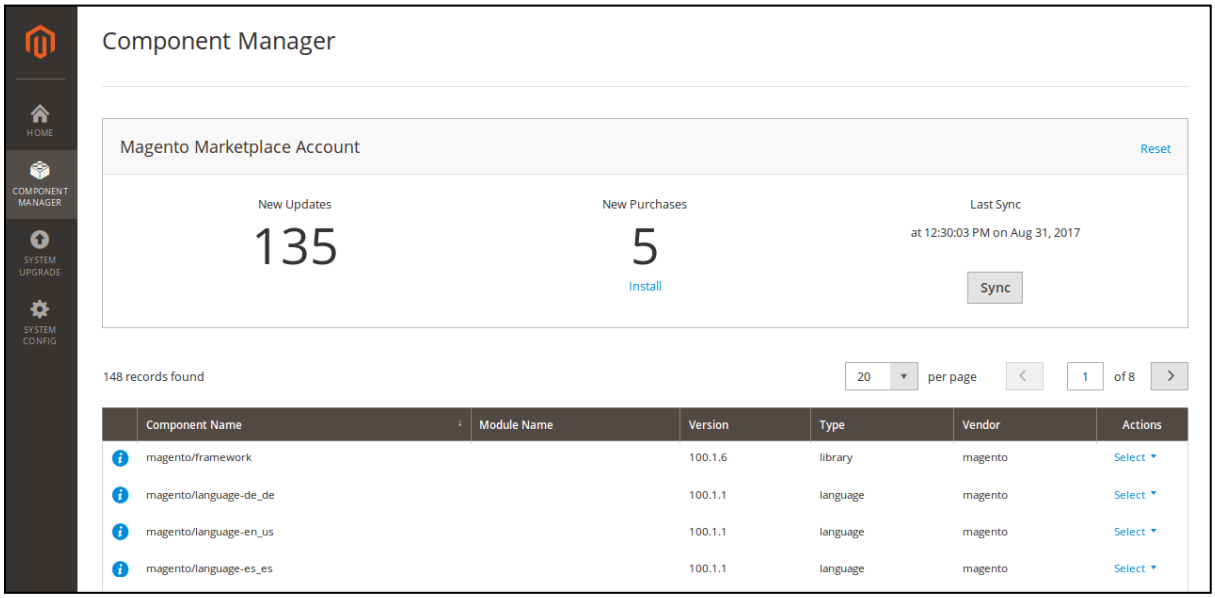
4. Log in to your Magento website, go to **System → Tools → Web Setup Wizard → SYSTEM CONFIG** then sign in using generated keys.



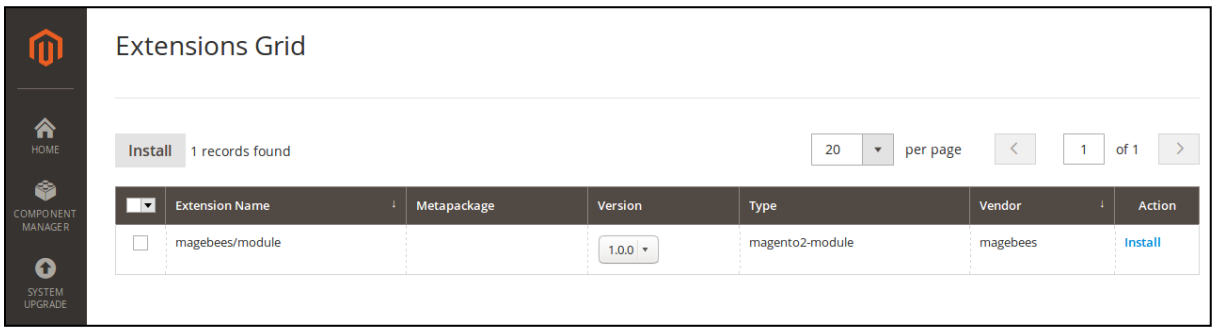
5. Click on the '**Component Manager** '.



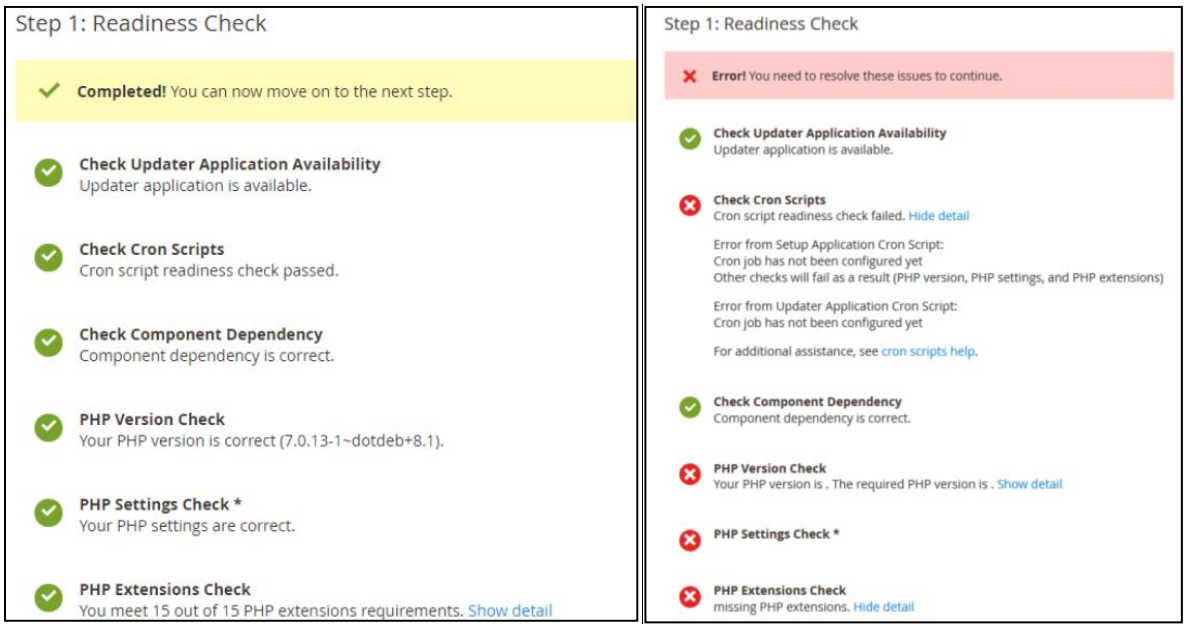
6. Press the '**Sync**' button and then install available extensions.



7. Select the following extension packages and click 'Install'.
   ⇨ **magebees/module-abandoned-cart**

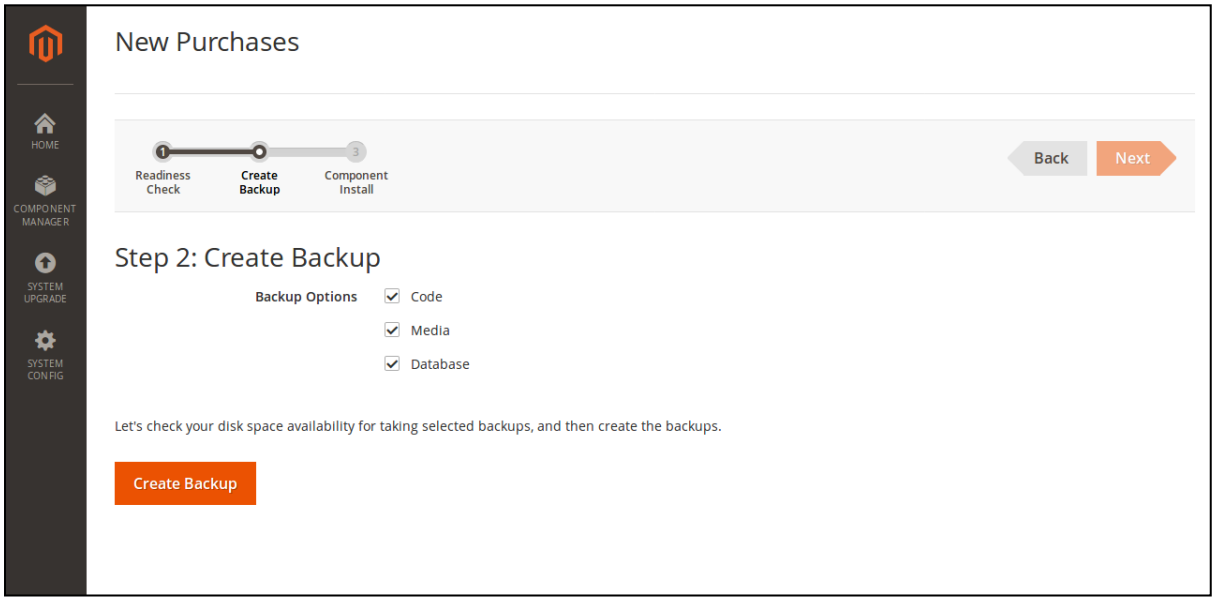


8. Run readiness check.

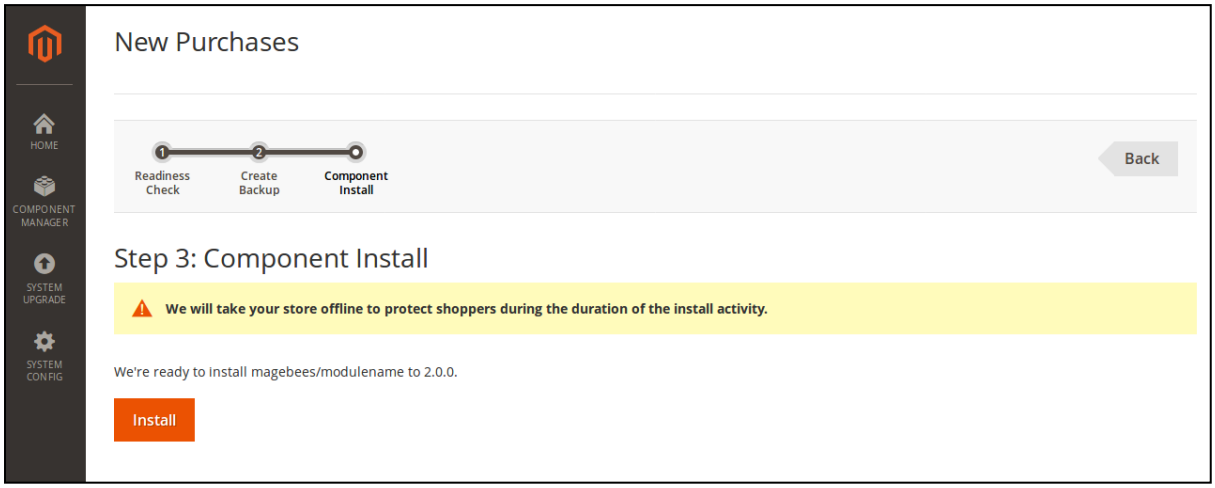


NOTE: During the readiness check process if you find the above errors, please make sure you've configured the cron job for Magento properly. Here you'll find the information on how to set up the cron job for Magento.

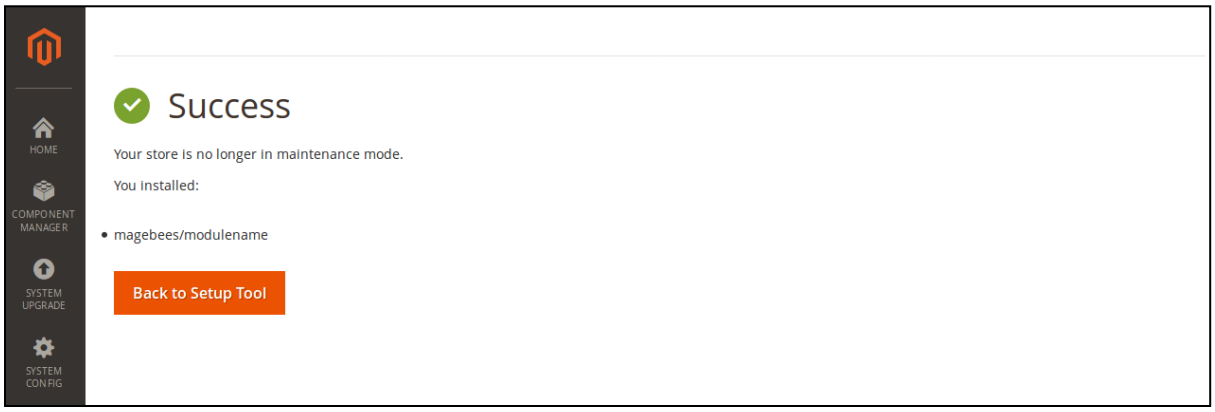
9. Create Backup



10. Install the Component. The installation process takes a couple of minutes.



11. After the installation is complete, you'll see the success page.



⇨ Once our extension installed then you can access menu from catalog section.
