<input type="checkbox"/>	Blocks HTML output	Page blocks HTML	BLOCK_HTML	DISABLED
<input type="checkbox"/>	Collections Data	Collection data files	COLLECTION_DATA	DISABLED
<input type="checkbox"/>	Reflection Data	API interfaces reflection data	REFLECTION	DISABLED
<input type="checkbox"/>	Database DDL operations	Results of DDL queries, such as describing tables or indexes	DB_DDL	DISABLED
<input type="checkbox"/>	Magebees Improved Layered Navigation	Settings for attribute filters and options	MAGEBEEES_LAYEREDNAVIGATION	DISABLED
<input type="checkbox"/>	EAV types and attributes	Entity types declaration cache	EAV	DISABLED
<input type="checkbox"/>	Customer Notification	Customer Notification	CUSTOMER_NOTIFICATION	DISABLED
<input type="checkbox"/>	Integrations Configuration	Integration configuration file	INTEGRATION	DISABLED
<input type="checkbox"/>	Integrations API Configuration	Integrations API configuration file	INTEGRATION_API_CONFIG	DISABLED
<input type="checkbox"/>	Page Cache	Full page caching	FPC	DISABLED
<input type="checkbox"/>	Translations	Translation files	TRANSLATE	DISABLED
<input type="checkbox"/>	Web Services Configuration	REST and SOAP configurations, generated WSDL file	WEBSERVICE	DISABLED

You also should run the Magento in developer mode when you’re extending or customizing it. You can use this command line to show the current mode:

```
php bin/magento deploy:mode:show
```

Use this command to change to developer mode:

```
php bin/magento deploy:mode:set developer
```

Please refer below link for how to set Magento mode.

<http://devdocs.magento.com/guides/v2.2/config-guide/cli/config-cli-subcommands-mode.html>

INSTALLATION STEPS:

Purchase Module From MageBees:

- **Install Using Web Wizard Module Manager :**

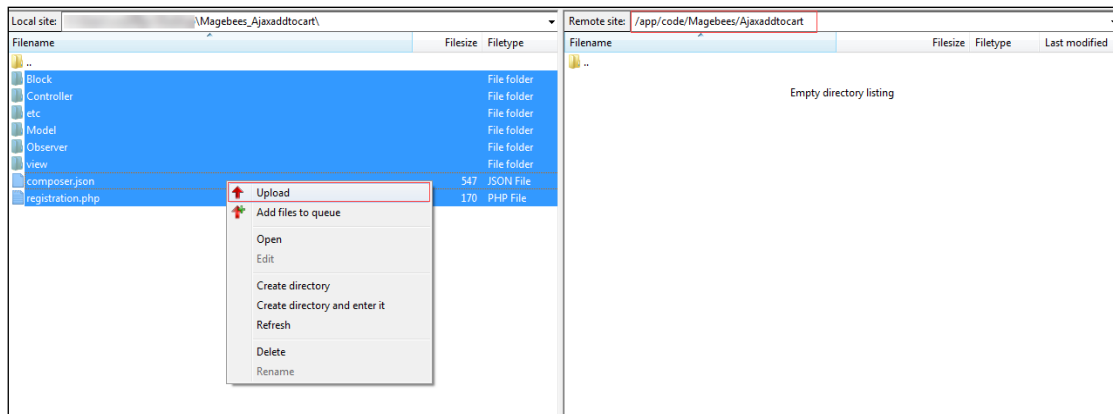

1. Download Zip files from Magebees Account and Upload Files on Your Magento Server.

Step-1

- ⇒ Unpack the contents of the “**Magebees_Ajaxaddtocart.zip**” folder that you have downloaded.

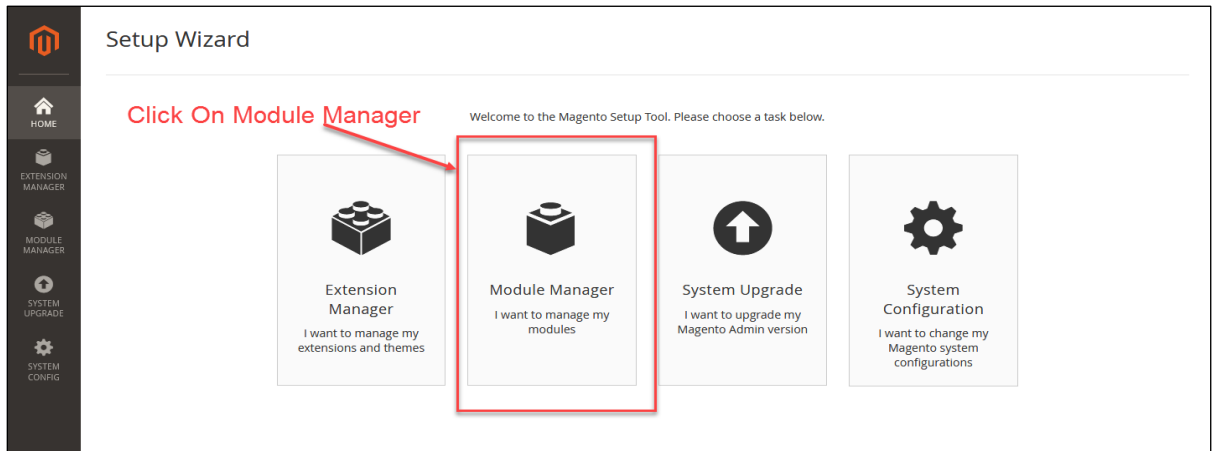

Step-2

- ⇒ Create “**Magebees**” folder in your <**magento root directory**>/**app/code** directory, if “**Magebees**” Folder not exist.
- ⇒ Create “**Ajaxaddtocart**” folder in your <**magento root directory**>/**app/code/Magebees** directory.
- ⇒ Copy the content of “**Magebees_Ajaxaddtocart**” folder in your <**magento root directory**>/**app/code/Magebees/Ajaxaddtocart** directory and follow the below mentioned step.

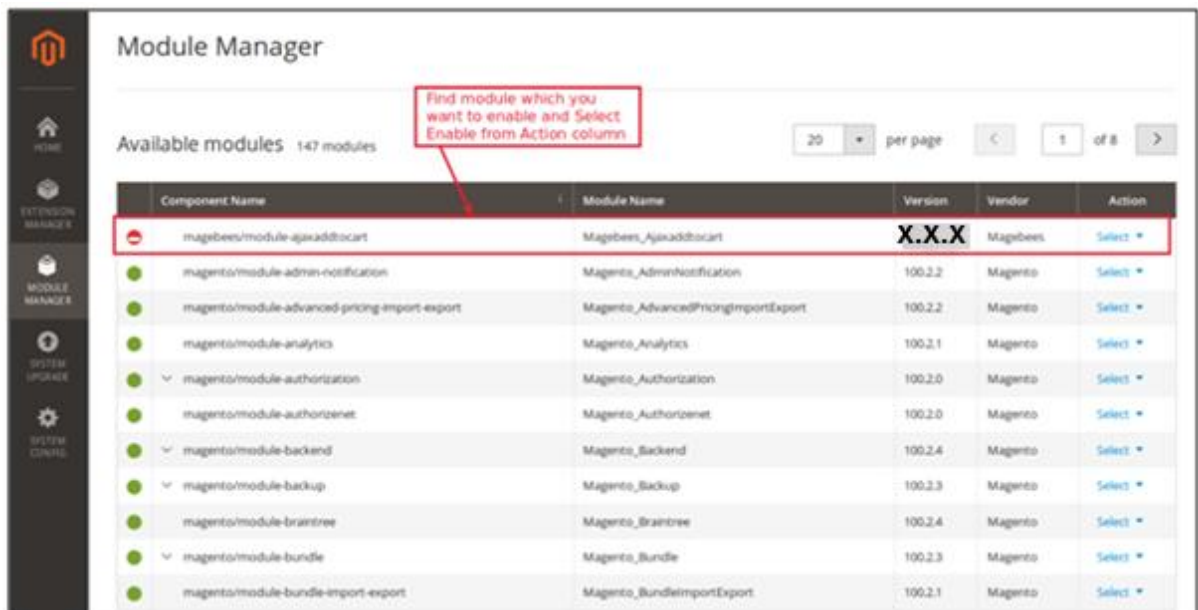

Ajax Add To Cart Extension for Magento 2 By MageBees

2. Go to System -> Tools -> Web Wizard Setup. Then click on the 'ModuleManager'.

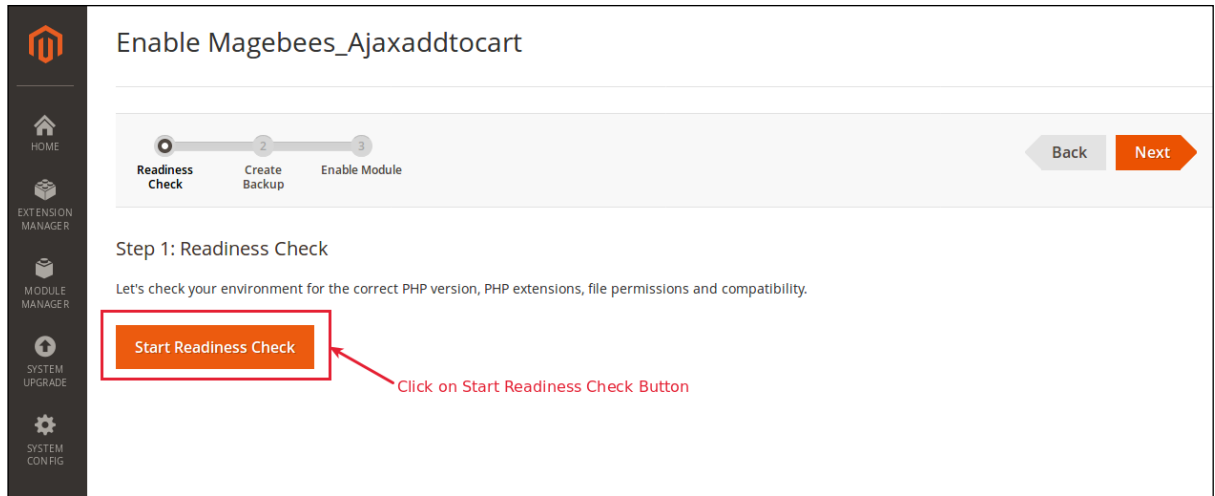

3. We will go to Module Manager Page. Here all available modules listed. Using Action drop-down we will enable and disable the module.

Ajax Add To Cart Extension for Magento 2 By MageBees

4. Run readiness check.

The screenshot displays the 'Enable Magebees_Ajaxaddtocart' wizard in the MageBees Admin interface. The left sidebar contains navigation options: HOME, EXTENSION MANAGER, MODULE MANAGER, SYSTEM UPGRADE, and SYSTEM CONFIG. The main content area shows a progress bar with three steps: 1. Readiness Check (active), 2. Create Backup, and 3. Enable Module. Below the progress bar, the text reads 'Step 1: Readiness Check' and 'Let's check your environment for the correct PHP version, PHP extensions, file permissions and compatibility.' A red box highlights the 'Start Readiness Check' button, with a red arrow pointing to it from the text 'Click on Start Readiness Check Button'. Navigation buttons 'Back' and 'Next' are visible at the top right of the wizard.

Ajax Add To Cart Extension for Magento 2 By MageBees

Readiness Check Success:

The screenshot shows the 'Enable Magebees_Ajaxaddtocart' interface. At the top, a progress bar indicates three steps: 1. Readiness Check (completed), 2. Create Backup, and 3. Enable Module. Navigation buttons include 'Try Again', 'Back', and 'Next'. The main content area is titled 'Step 1: Readiness Check' and features a yellow success banner: 'Completed! You can now move on to the next step.' Below this, a list of checks is shown with green checkmarks:

- Check Updater Application Availability**: Updater application is available.
- Check Cron Scripts**: Cron script readiness check passed.
- Check Component Dependency**: Component dependency is correct.
- PHP Settings Check ***: Your PHP settings are correct.
- PHP Extensions Check**: You meet 21 out of 21 PHP extensions requirements. [Show detail](#)

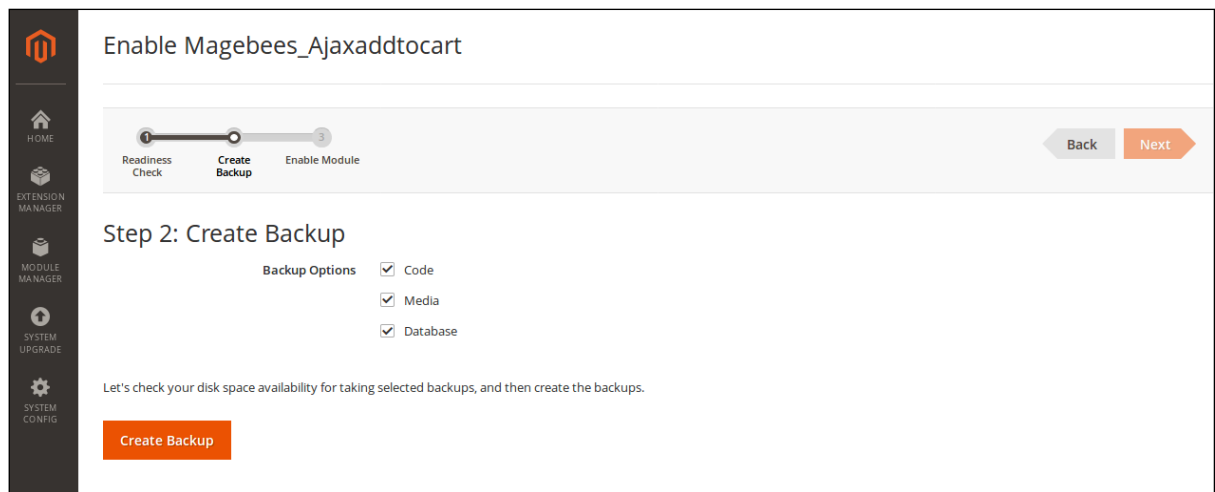

Readiness Check Failure:

The screenshot shows the 'Enable Magebees_Ajaxaddtocart' interface with a failure state. The progress bar shows 'Readiness Check' as failed. A red error banner reads: 'Error! You need to resolve these issues to continue.' The list of checks includes:

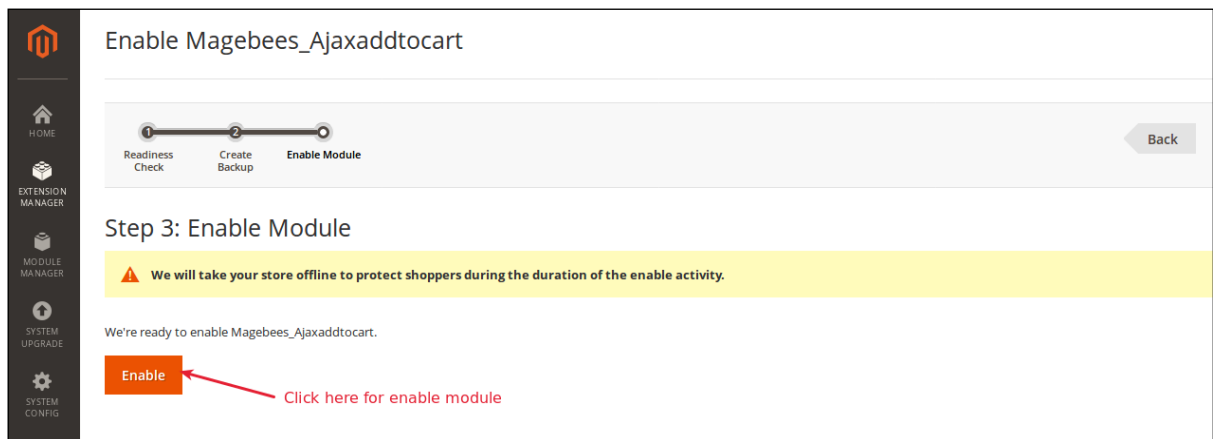

- Check Updater Application Availability**: Updater application is available.
- Check Cron Scripts**: Cron script readiness check failed. [Hide detail](#)
Error from Setup Application Cron Script: Cron job has not been configured yet. Other checks will fail as a result (PHP version, PHP settings, and PHP extensions)
Error from Updater Application Cron Script: Cron job has not been configured yet
For additional assistance, see [cron scripts help](#).
- Check Component Dependency**: Component dependency is correct.
- PHP Settings Check ***: Failed.
- PHP Extensions Check**: missing PHP extensions. [Hide detail](#)
The best way to resolve this is to install the correct missing extensions. The exact fix depends on our server, your host, and other system variables. Our [PHP extension help](#) can get you started.
For additional assistance, contact your hosting provider.

1. Please check your system configuration with magento stack technology requirements.
<http://devdocs.magento.com/guides/v2.2/install-gde/system-requirements-tech.html>
 2. Please make sure you have configured Cron job for Magento properly.
[Here you'll find the information on how to set up the Cron job for Magento.](#)
5. Create back up: if you want to take Backup before install module then select back up option.

6. Enable the module. The installation process takes a couple of minutes.

Ajax Add To Cart Extension for Magento 2 By MageBees

When you click on Enable module then it will redirect to process extensions section.

Process extensions

1 Readiness Check 2 Create Backup 3 Enable Module

Process extensions Status:
Update application is running

Console Log

```
[2018-07-03 06:29:02 UTC] Job "setup:maintenance:enable []" has started
Enabled maintenance mode

[2018-07-03 06:29:02 UTC] Job "setup:maintenance:enable []" has been successfully completed
[2018-07-03 06:29:02 UTC] Job "setup:cache:disable []" has started
Changed cache status:
config: 1 -> 0
layout: 1 -> 0
block_html: 1 -> 0
collections: 1 -> 0
```

7. After the installation is complete, you'll see the success page.

Success

Your store is no longer in maintenance mode.

You enabled:

- Magebees_Ajaxaddtocart

Back to Setup Tool

Ajax Add To Cart Extension for Magento 2 By MageBees

- **Install Using SSH :**

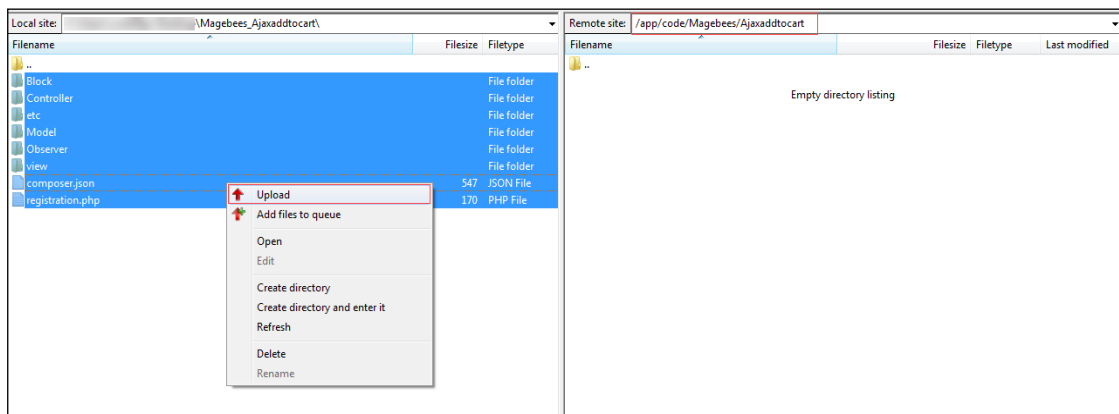

Download Zip files from Magebees Account and Upload Files on Your Magento Server.

Step-1

⇒ Unpack the contents of the “**Magebees_Ajaxaddtocart.zip**” folder that you have downloaded.

Step-2

- ⇒ Create “**Magebees**” folder in your <**magento root directory**>/app/code directory, if “**Magebees**” Folder not exist.
- ⇒ Create “**Ajaxaddtocart**” folder in your <**magento root directory**>/app/code/Magebees directory.
- ⇒ Copy the content of “**Magebees_Ajaxaddtocart**” folder in your <**magento directory**>/app/code/Magebees/Ajaxaddtocart directory and follow the below mentioned step.

- 1) Open command prompt /terminal and change directory to your magento install directory.
- 2) Run following command :

```
php bin/magento module:enable Magebees_Ajaxaddtocart
```

```
php bin/magento setup:upgrade
```

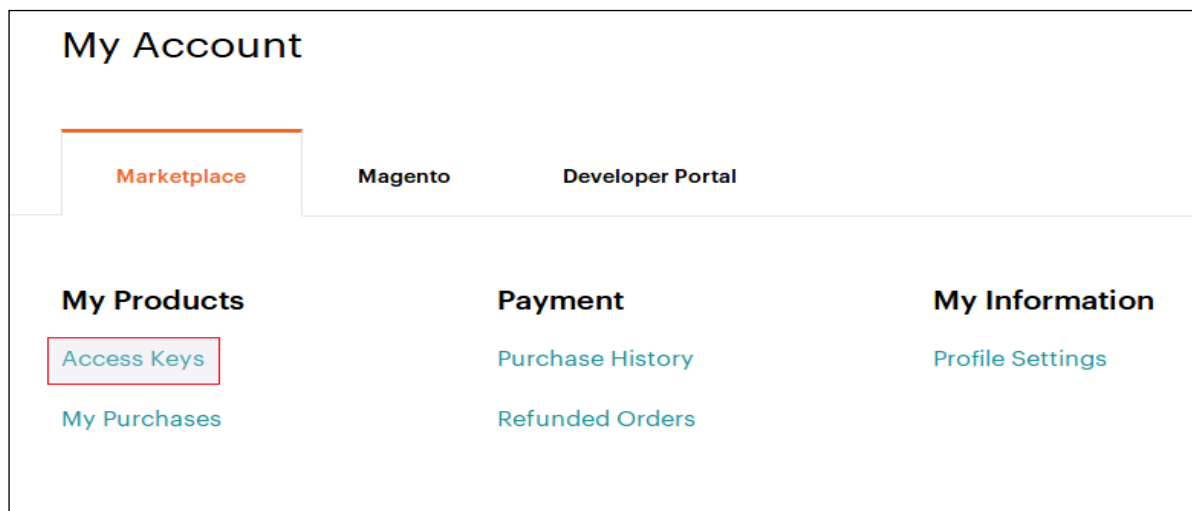

```
php bin/magento setup:static-content:deploy
```

Go to Admin -> SYSTEM -> Tools -> Cache Management, selecting all caches, clicking “refresh” from the drop down menu and submitting the changes.

Purchase Module Using Magento Market Place:

1. Login Into your market place account.
2. Open the 'My Access Keys' page from "My Profile".

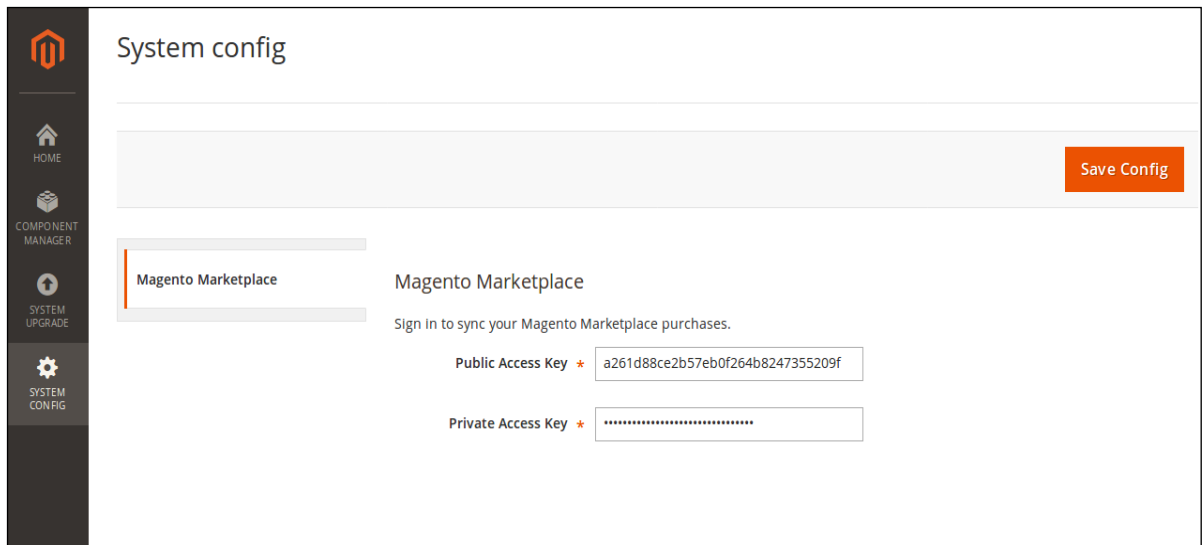

3. Click on the 'Access Key' button and the keys will be generated automatically.

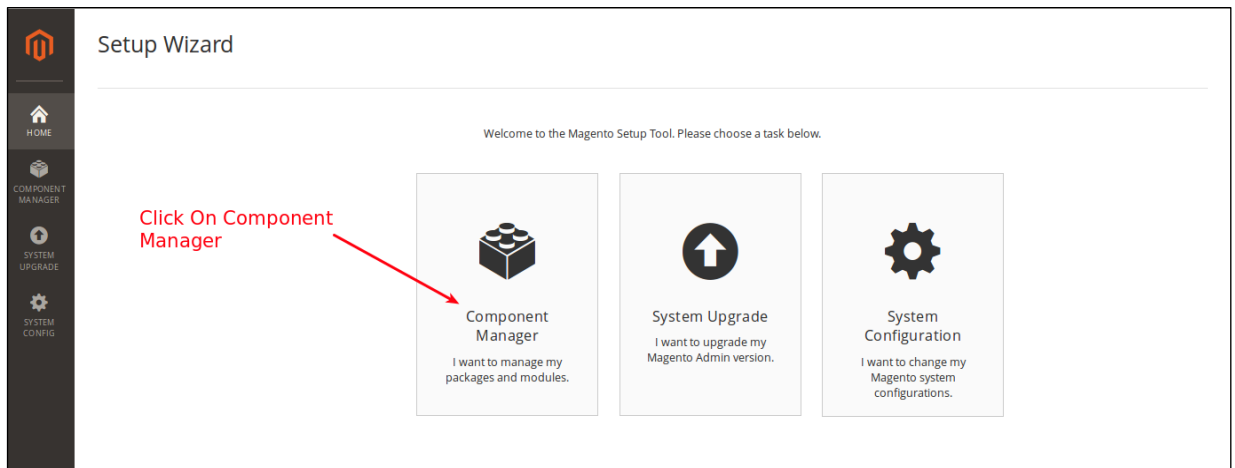

Ajax Add To Cart Extension for Magento 2 By MageBees

4. Log in to your Magento website, go to System → Web Setup Wizard → System Config then sign in using generated keys.

5. Click on the 'Component Manager'.

Ajax Add To Cart Extension for Magento 2 By MageBees

- Press the 'Sync' button and then install available extensions.

The screenshot shows the 'Component Manager' interface. At the top, there's a 'Magento Marketplace Account' section with a 'Reset' link. Below this, three statistics are displayed: 'New Updates' (135), 'New Purchases' (5), and 'Last Sync' (at 12:30:03 PM on Aug 31, 2017). A 'Sync' button is located to the right of the last sync information. Below the statistics, it says '148 records found' and shows pagination controls (20 per page, 1 of 8). A table lists the following updates:

Component Name	Module Name	Version	Type	Vendor	Actions
magento/framework		100.1.6	library	magento	Select
magento/language-de_de		100.1.1	language	magento	Select
magento/language-en_us		100.1.1	language	magento	Select
magento/language-es_es		100.1.1	language	magento	Select

- Select the following extension packages and click 'Install'.

→ magebees/module-ajaxaddtocart

The screenshot shows the 'Extensions Grid' interface. It displays '1 records found' and a table with the following extension:

Extension Name	Metapackage	Version	Type	Vendor	Action
magebees/module		1.0.0	magento2-module	magebees	Install

- Run readiness check.

The screenshot shows the 'New Purchases' interface. It features a progress bar with three steps: 'Readiness Check', 'Create Backup', and 'Component Install'. The 'Readiness Check' step is currently active. Below the progress bar, there's a 'Step 1: Readiness Check' section with the text 'Let's check your environment for the correct PHP version, PHP extensions, file permissions and compatibility.' and a 'Start Readiness Check' button. Navigation buttons 'Back' and 'Next' are also visible.

Ajax Add To Cart Extension for Magento 2 By MageBees
