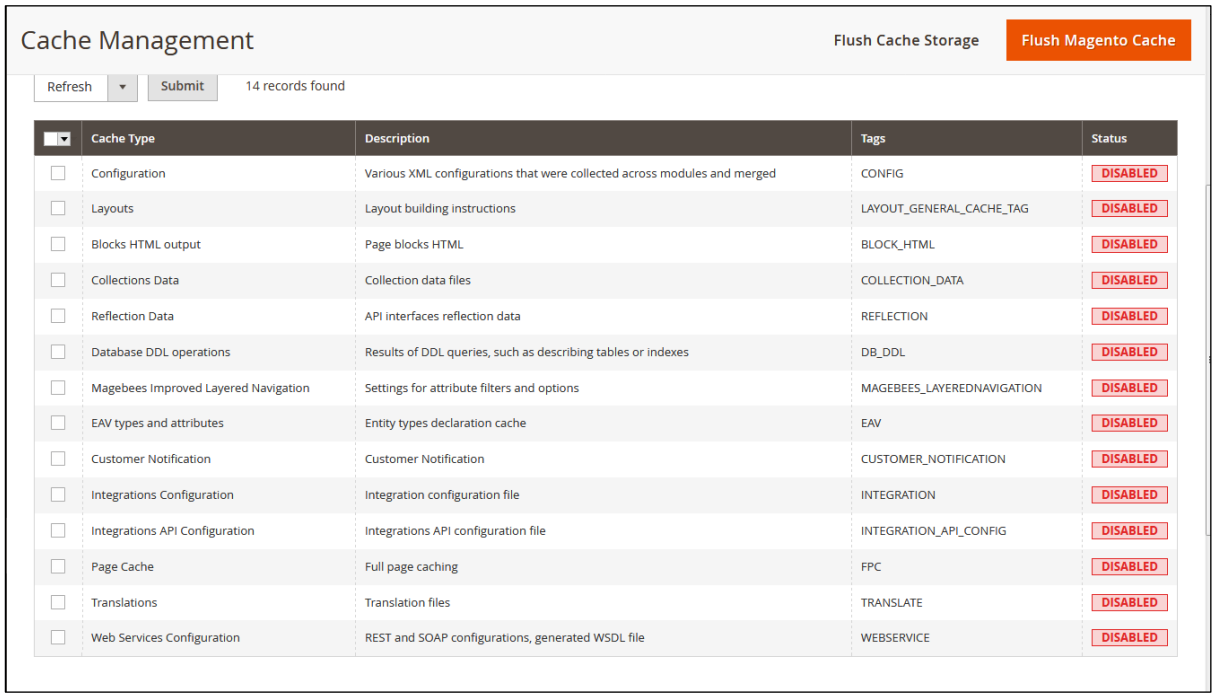
PRE-INSTALLATION

Go to Admin → SYSTEM → Tools → Cache Management, select all caches, click “Disable” from the drop-down menu and submit the changes.



You also should run the Magento in developer mode when you’re extending or customizing it. You can use this command line to show the current mode:

```
php bin/magento deploy:mode:show
```

Use this command to change to developer mode:

```
php bin/magento deploy:mode:set developer
```

Please refer below link for how to set Magento mode.

http://devdocs.magento.com/guides/v2.2/config-guide/cli/config-cli-subcommands-mode.html

INSTALLATION STEPS:

Purchase Module From MageBees:

- **Install Using Web Wizard Module Manager :**

1. Download Zip files from Magebees Account and Upload Files on Your Magento Server.

Step-1

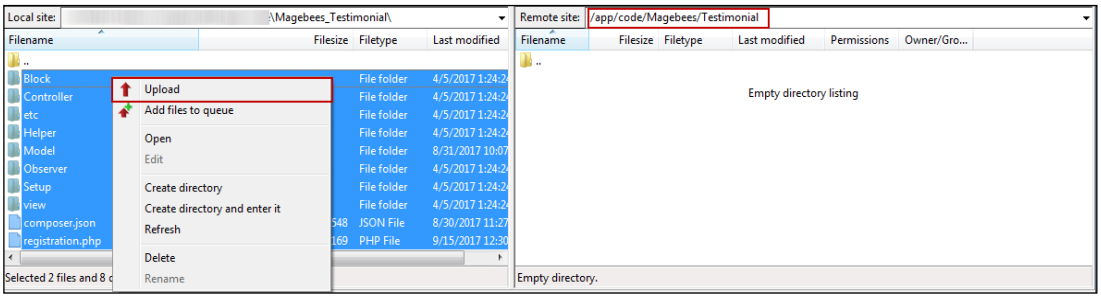
⇨ Unpack the contents of the "**Magebees_Testimonial -X.X.X.zip**" folder that you have downloaded.

Step-2

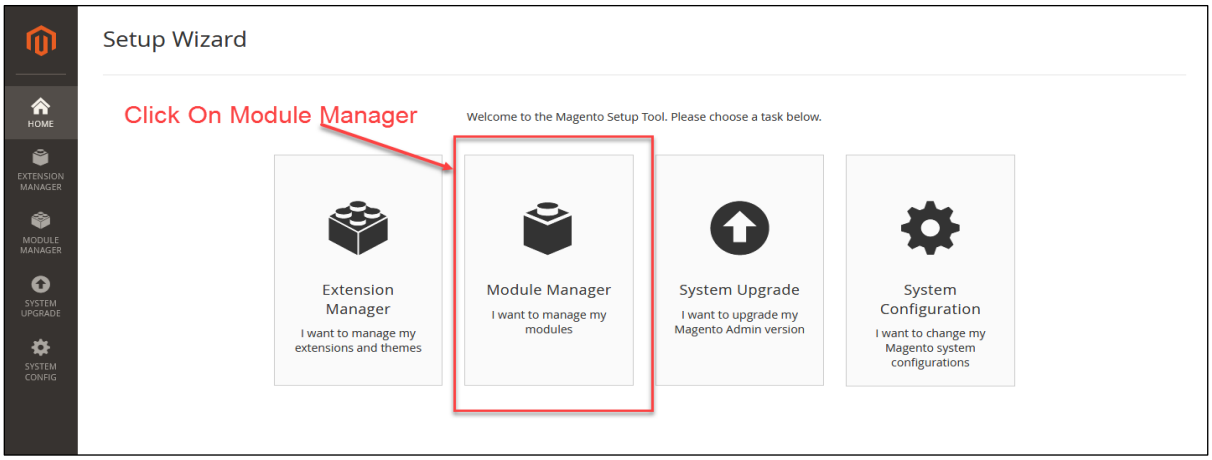
⇨ Create "**Magebees"** folder in your <**magento root directory>/app/code** directory, if "**Magebees"** Folder not exist.

⇨ Create "**Testimonial"** folder in your <**magento root directory>/app/code/Magebees** directory.

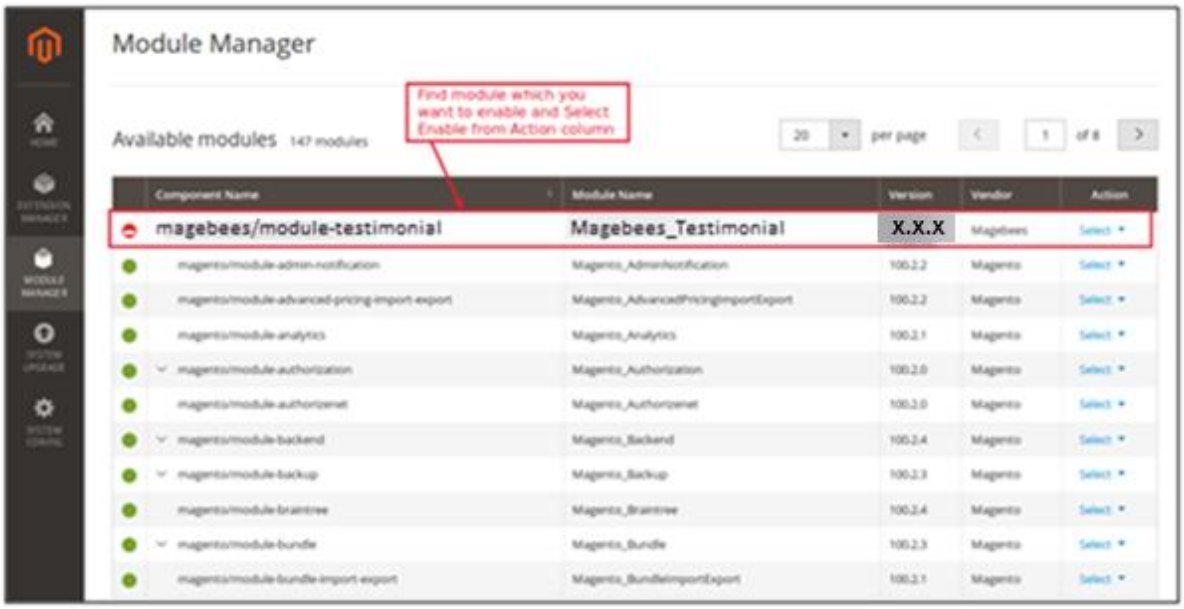
⇨ Copy the content of "**Magebees_Testimonial**" folder in your **<magento directory>/app/code/Magebees/Testimonial** directory and follow the below mentioned step.



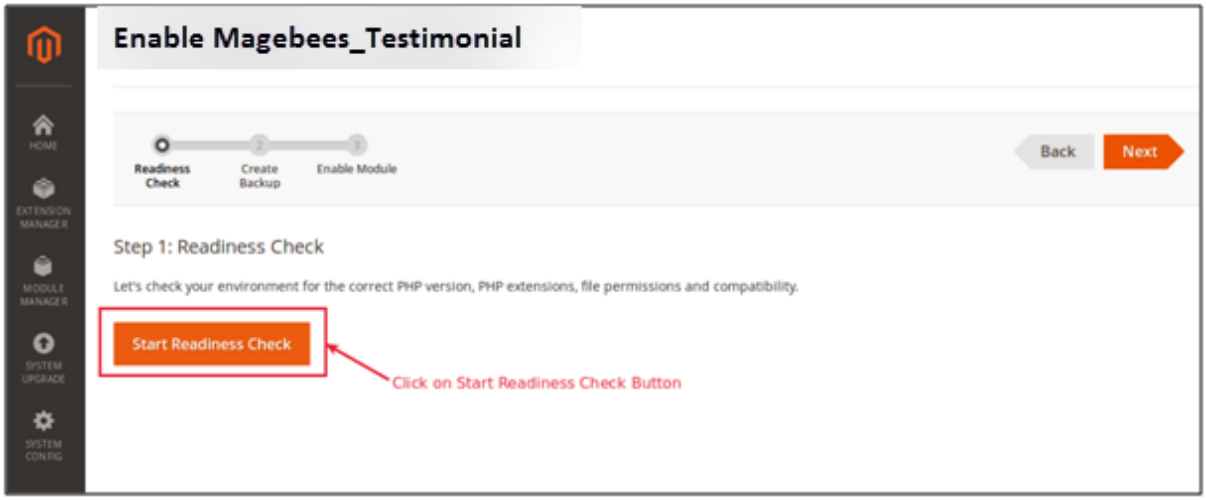
2. Go to System -> Tools -> Web Wizard Setup. Then click on the 'ModuleManager '.



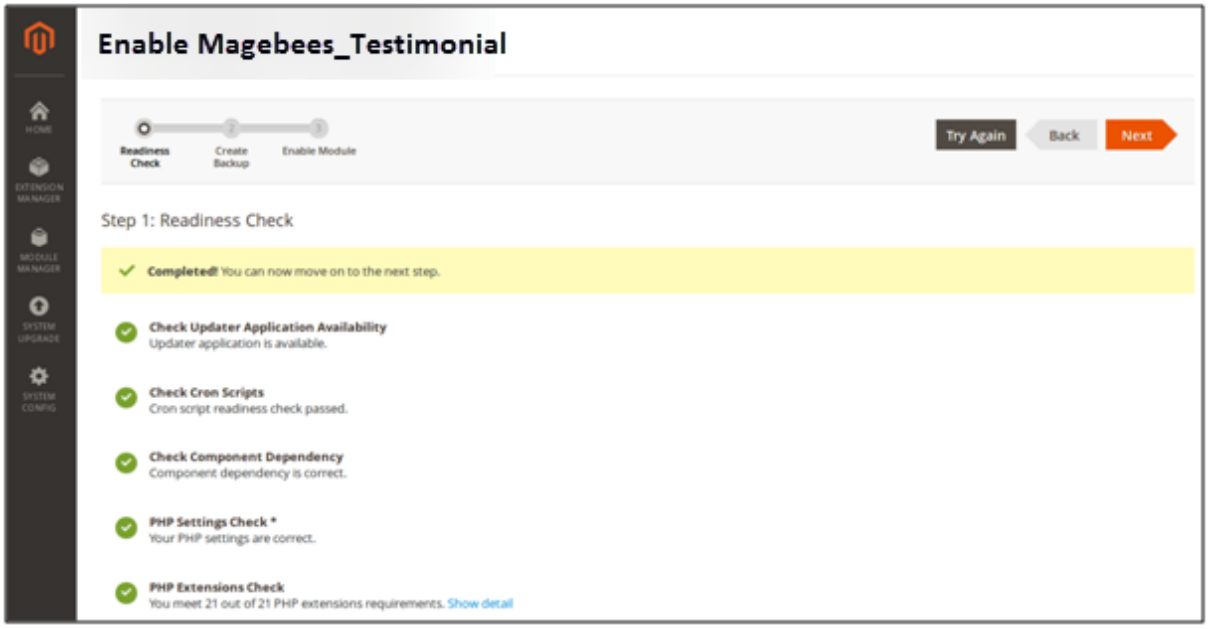
3. We will go to Module Manager Page. Here all available modules listed. Using Action drop-down we will enable and disable the module.



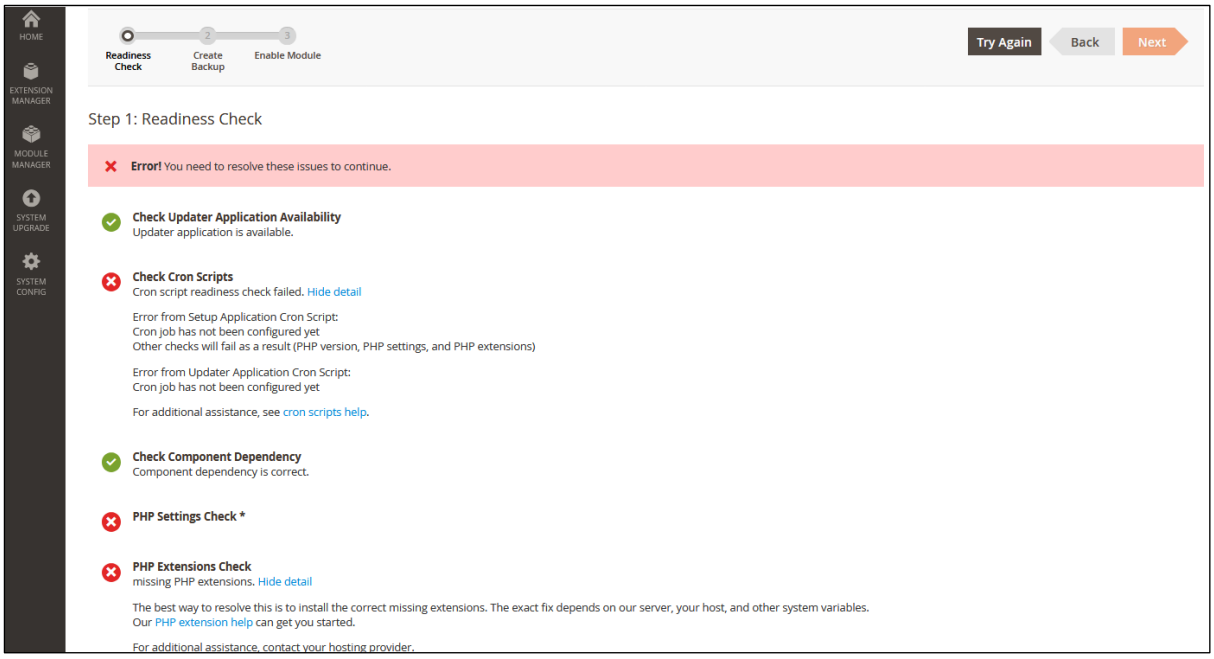
4. Run readiness check.



Readiness Check Success:



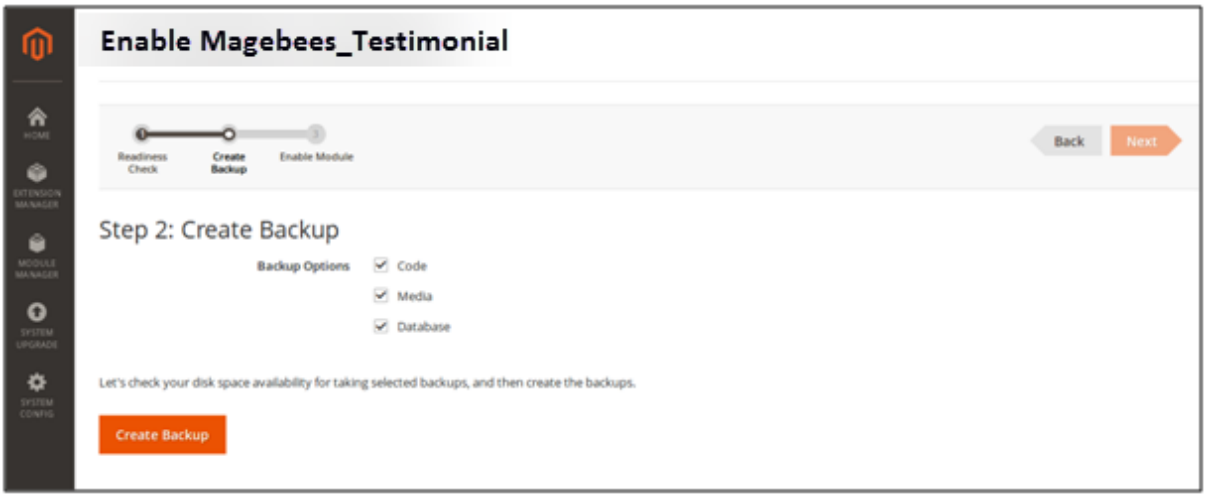
Readiness Check Failure:



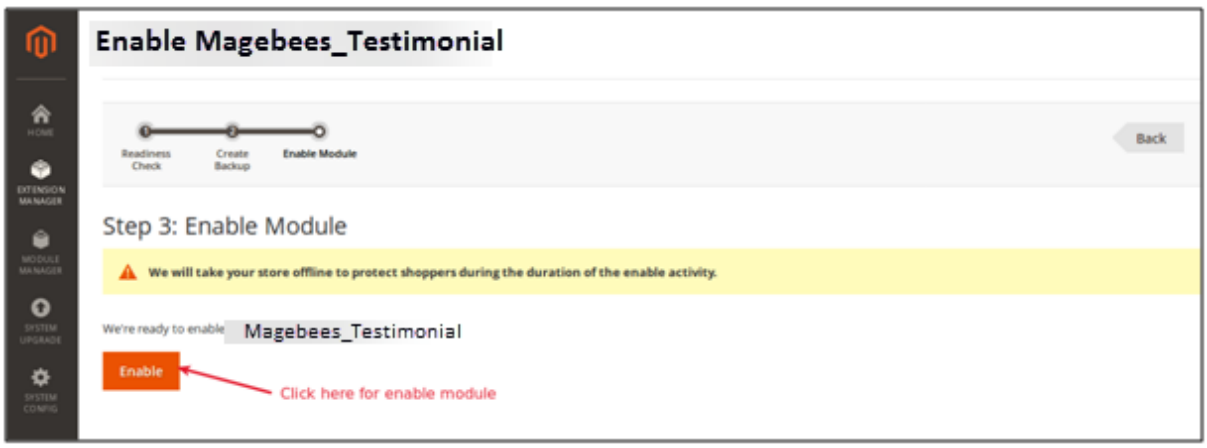
1. *Please check your system configuration with Magento stack technology requirements.*
   http://devdocs.magento.com/guides/v2.2/install-gde/system-requirements-tech.html

2. *Please make sure you have configured Cron job for Magento properly.*
   Here you'll find the information on how to set up the Cron job for Magento.

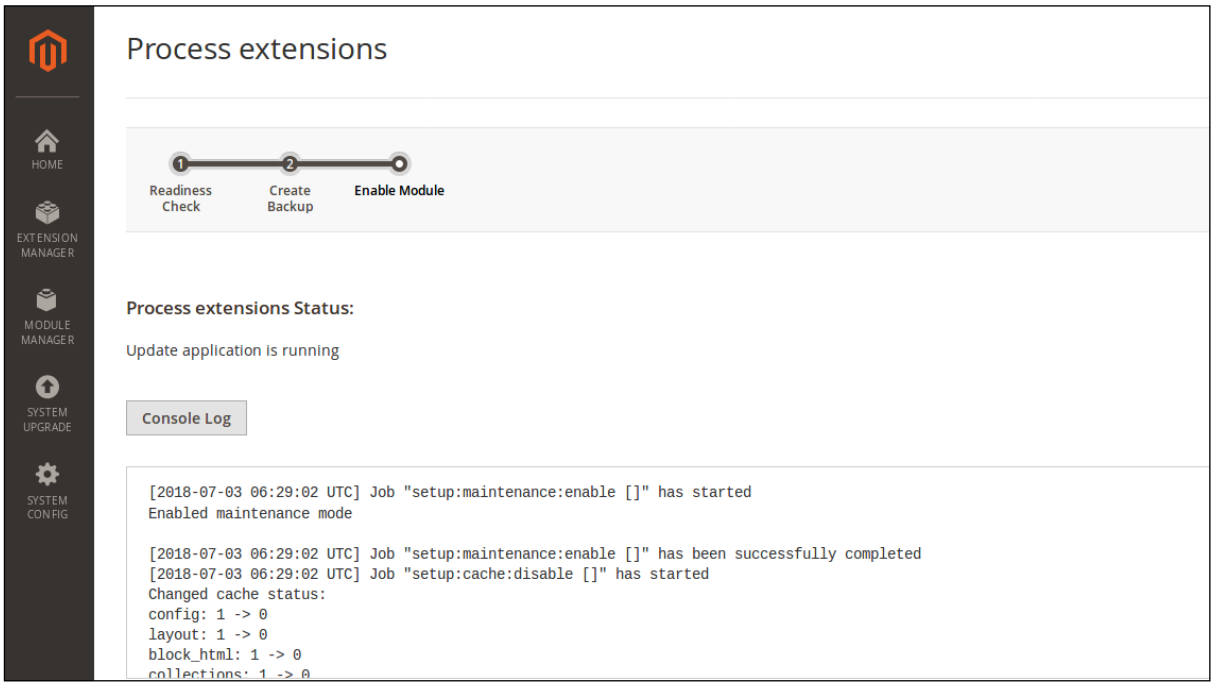
5. Create back up: if you want to take Backup before install module then select back up option.



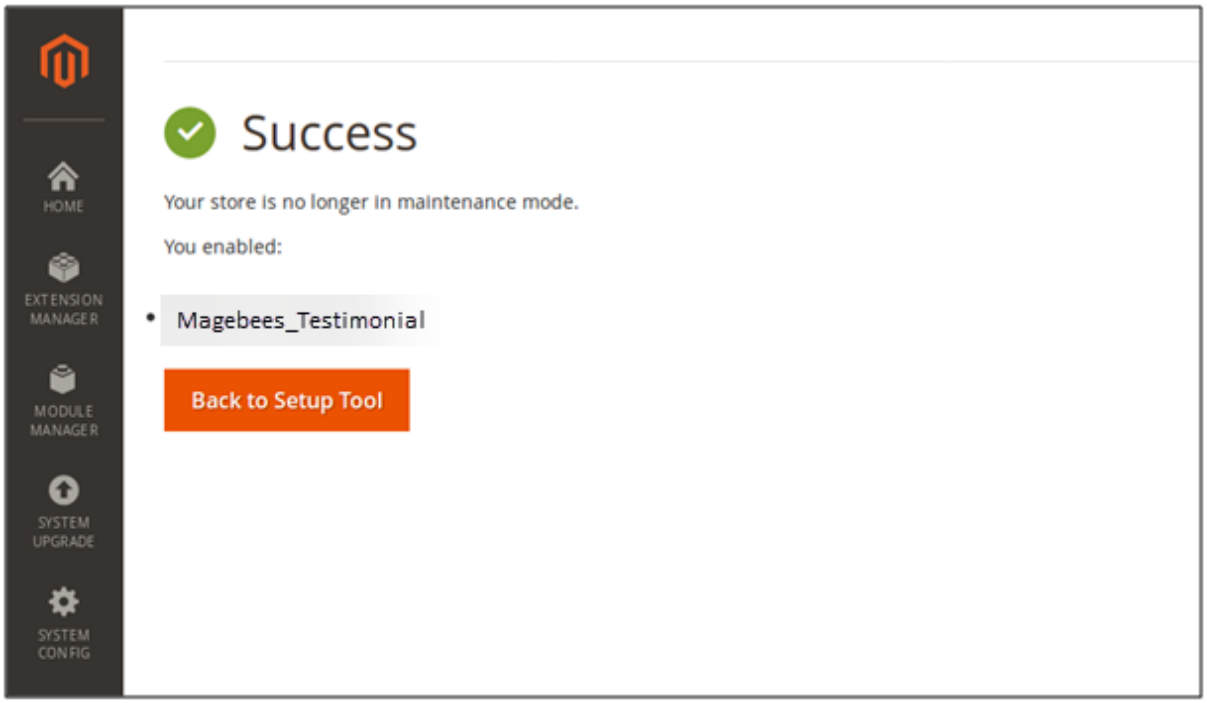
6. Enable the module. The installation process takes a couple of minutes.



When you click on Enable module then it will redirect to process extensions section.



7. After the installation is complete, you'll see the success page.



- **Install Using SSH :**

Download Zip files from Magebees Account and Upload Files on Your Magento Server.

Step-1

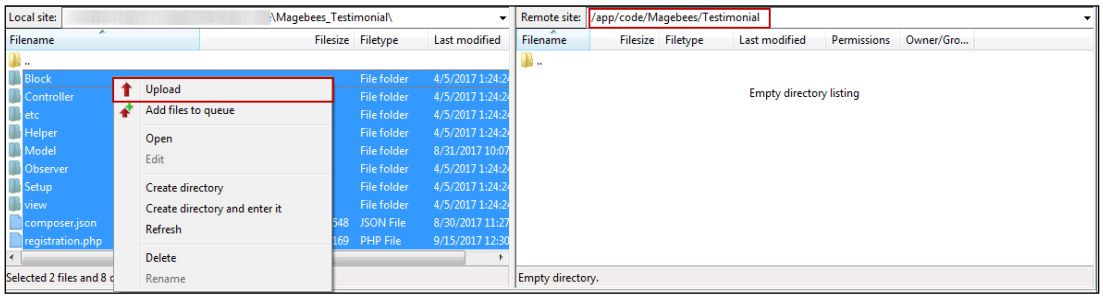
⇨ Unpack the contents of the "**Magebees_Testimonial-X.X.X.zip**" folder that you have downloaded.

Step-2

⇨ Create "**Magebees"** folder in your <**magento root directory>/app/code** directory, if "**Magebees"** Folder not exist.

⇨ Create "**Testimonial"** folder in your <**magento root directory>/app/code/Magebees** directory.

⇨ Copy the content of "**Magebees_Testimonial**" folder in your **<magento directory>/app/code/Magebees/Testimonial** directory and follow the below mentioned step.



1) Open command prompt /terminal and change directory to your magento install directory.
2) Run following command :

```
php bin/magento module:enable Magebees_Testimonial
```

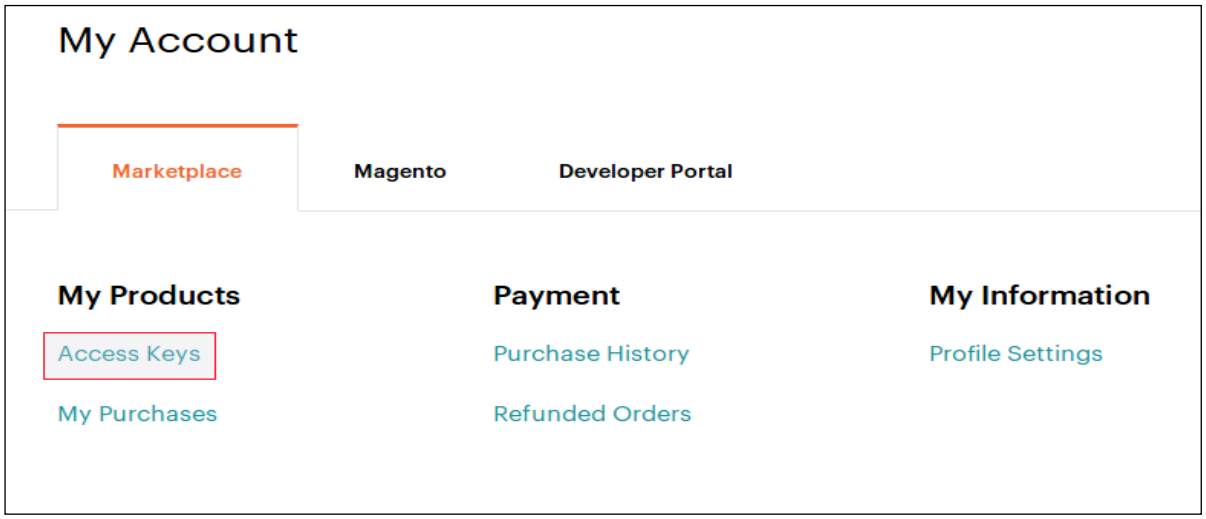
```
php bin/magento setup:upgrade
```

```
php bin/magento setup:static-content:deploy
```

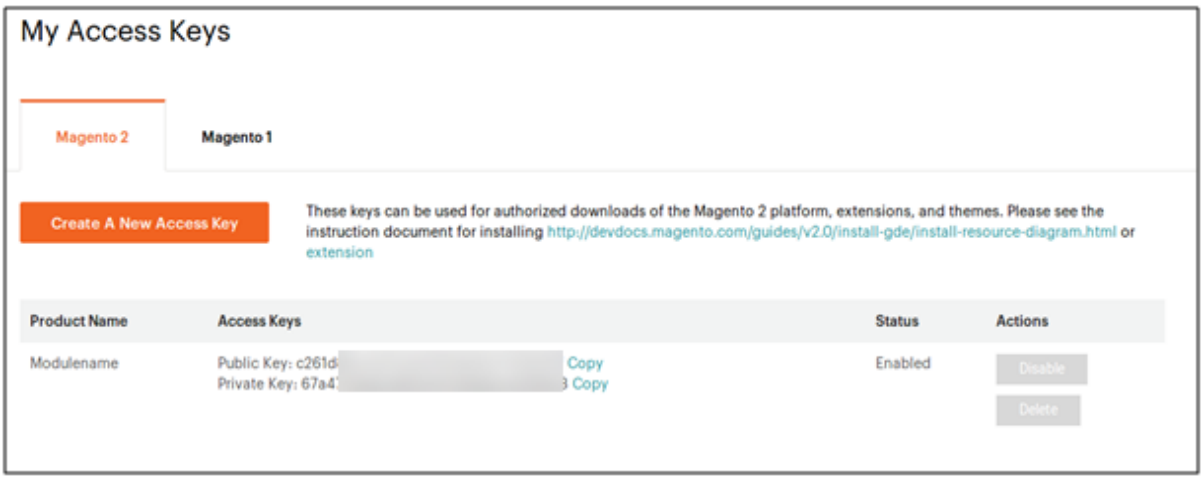
Go to Admin -> SYSTEM -> Tools -> Cache Management, selecting all caches, clicking "refresh" from the drop down menu and submitting the changes.

Purchase Module Using Magento Market Place:

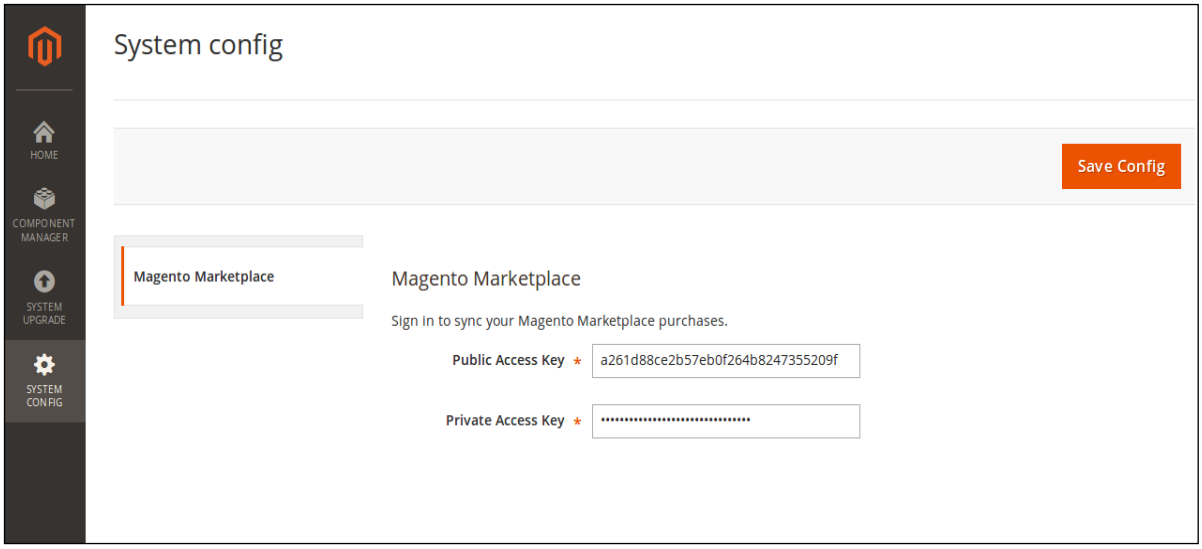
1. Login Into your market place account.
2. Open the 'My Access Keys' page from "My Profile".



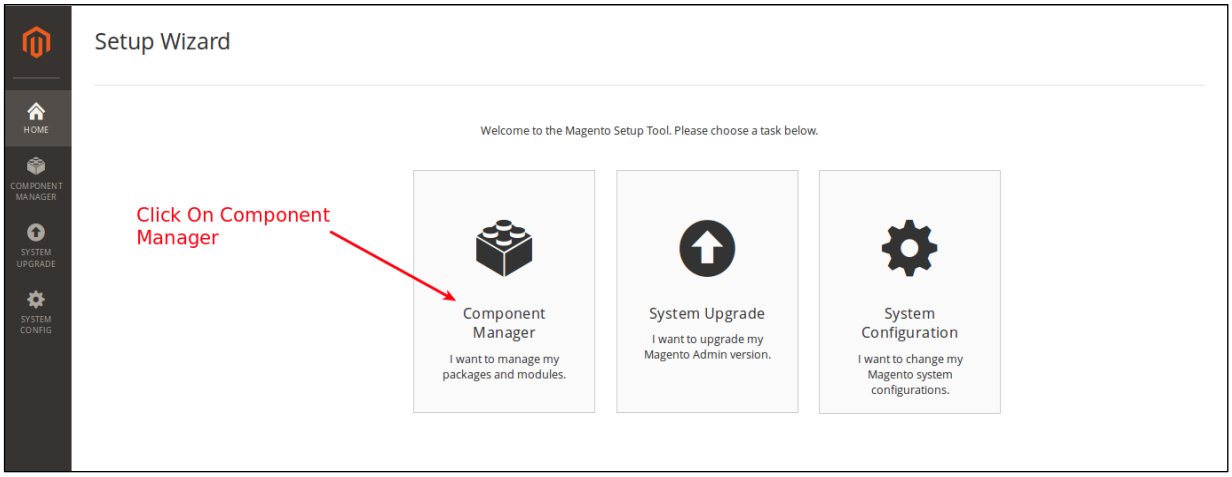
3. Click on the 'Access Key' button and the keys will be generated automatically.



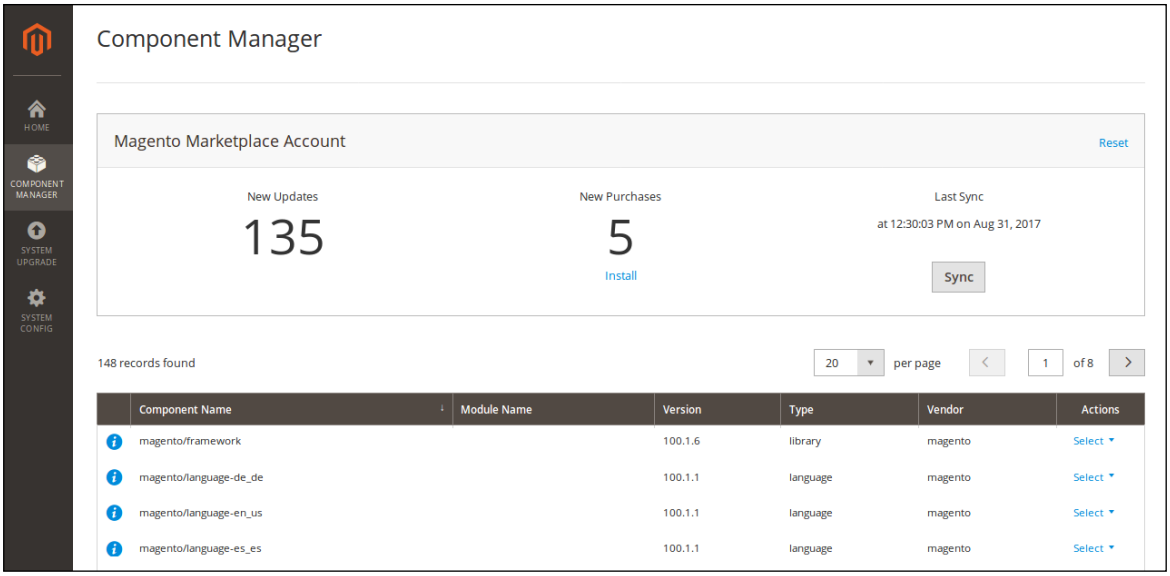
4. Log in to your Magento website, go to System → Web Setup Wizard → System Config then sign in using generated keys.



5. Click on the 'Component Manager '.

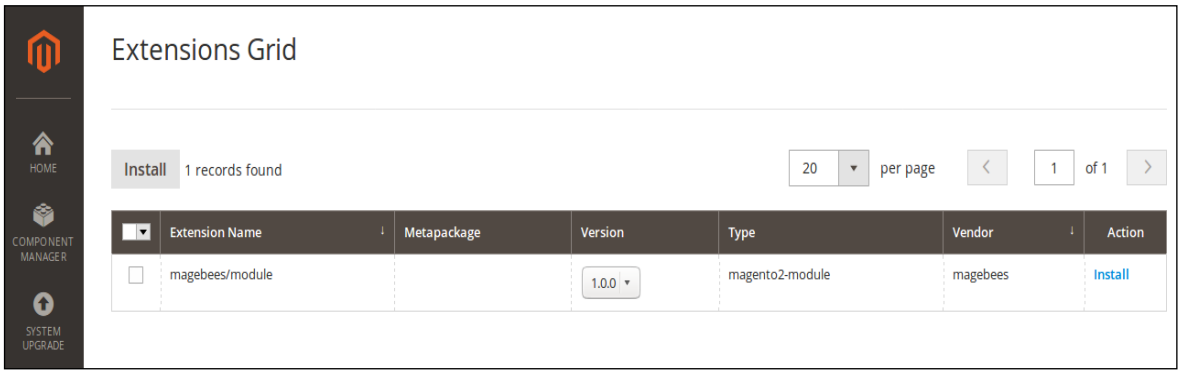


6. Press the 'Sync' button and then install available extensions.

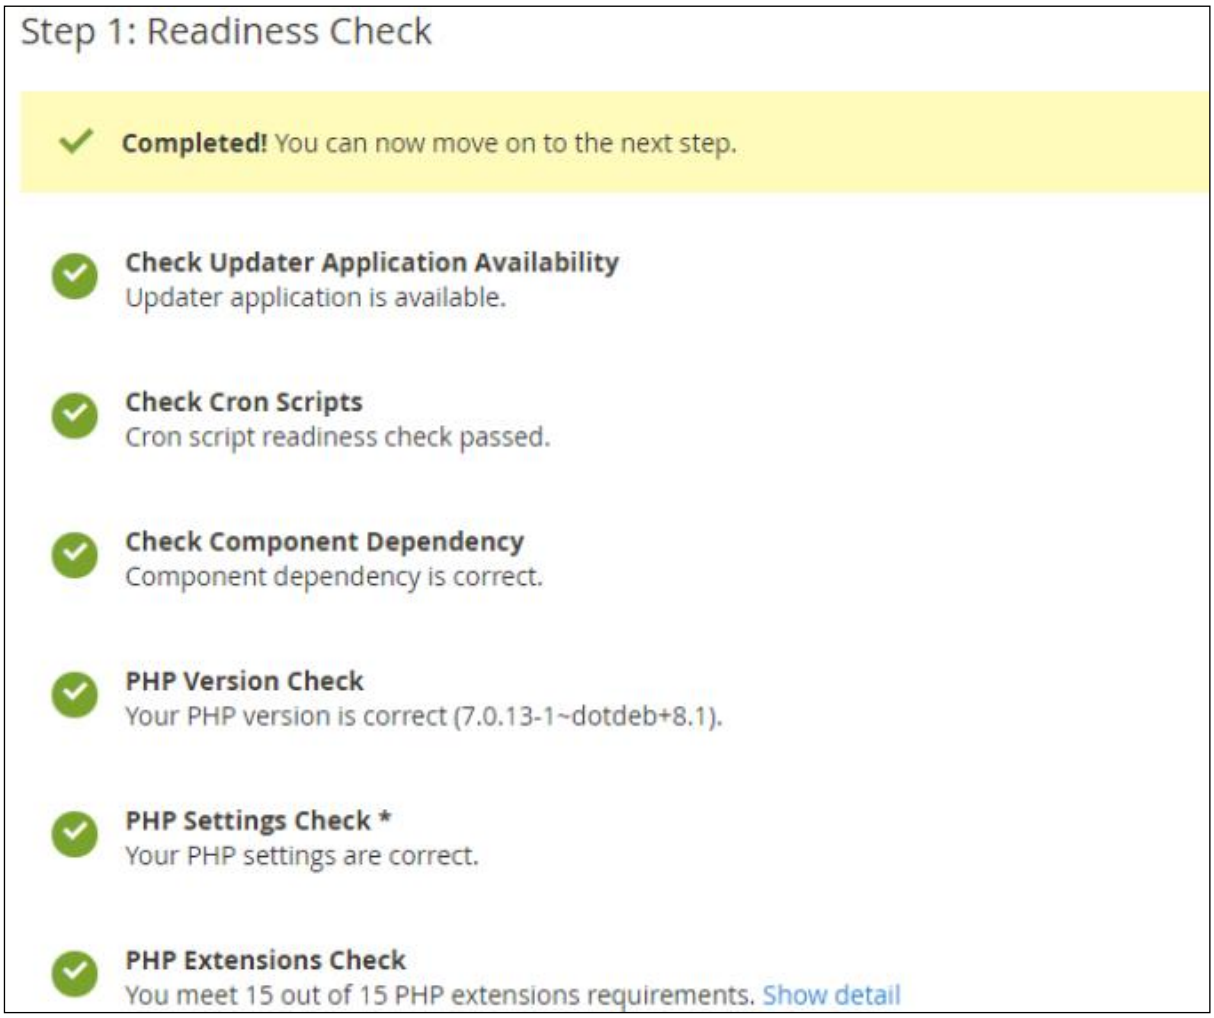


7. Select the following extension packages and click 'Install'.

→ magebees/module-testimonial

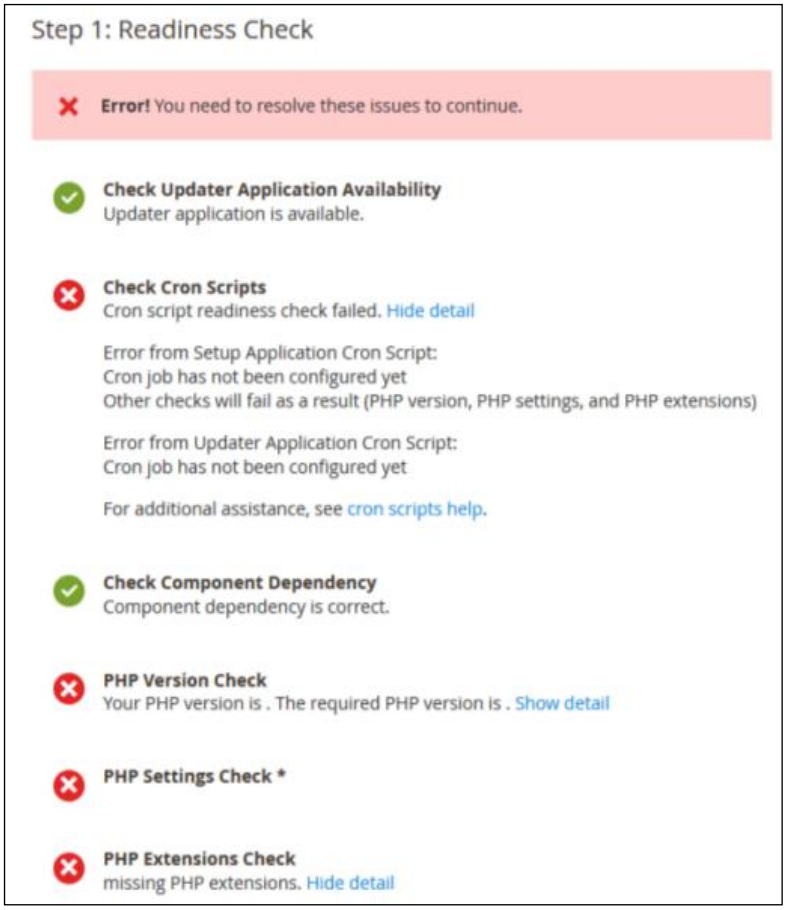


8. Run readiness check.



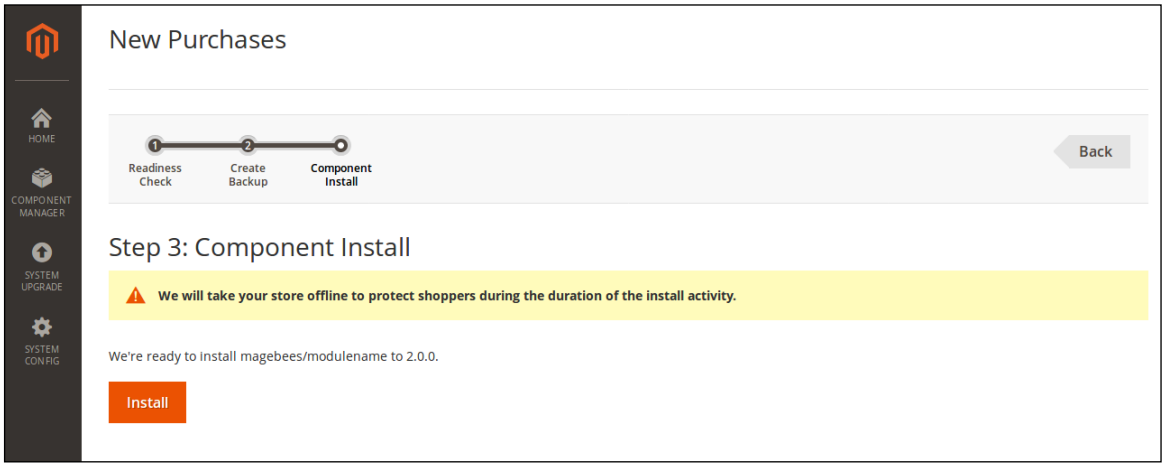
Step 1: Readiness Check
Completed! You can now move on to the next step.
Check Updater Application Availability
Updater application is available.
Check Cron Scripts
Cron script readiness check passed.
Check Component Dependency
Component dependency is correct.
PHP Version Check
Your PHP version is correct (7.0.13-1~dotdeb+8.1).
PHP Settings Check *
Your PHP settings are correct.
PHP Extensions Check
You meet 15 out of 15 PHP extensions requirements. Show detail

NOTE: If during the readiness check you find the following errors, please make sure you've configured the Cron job for Magento properly. Here you'll find the information on how to set up the Cron job for Magento.



9. Create Backup

10. Install the extension. The installation process takes a couple of minutes.



11. After the installation is complete, you'll see the success page.

Module Displayed In Admin Section
