You also should run the Magento in developer mode when you’re extending or customizing it. You can use this command line to show current mode:

```
php bin/magento deploy:mode:show
```

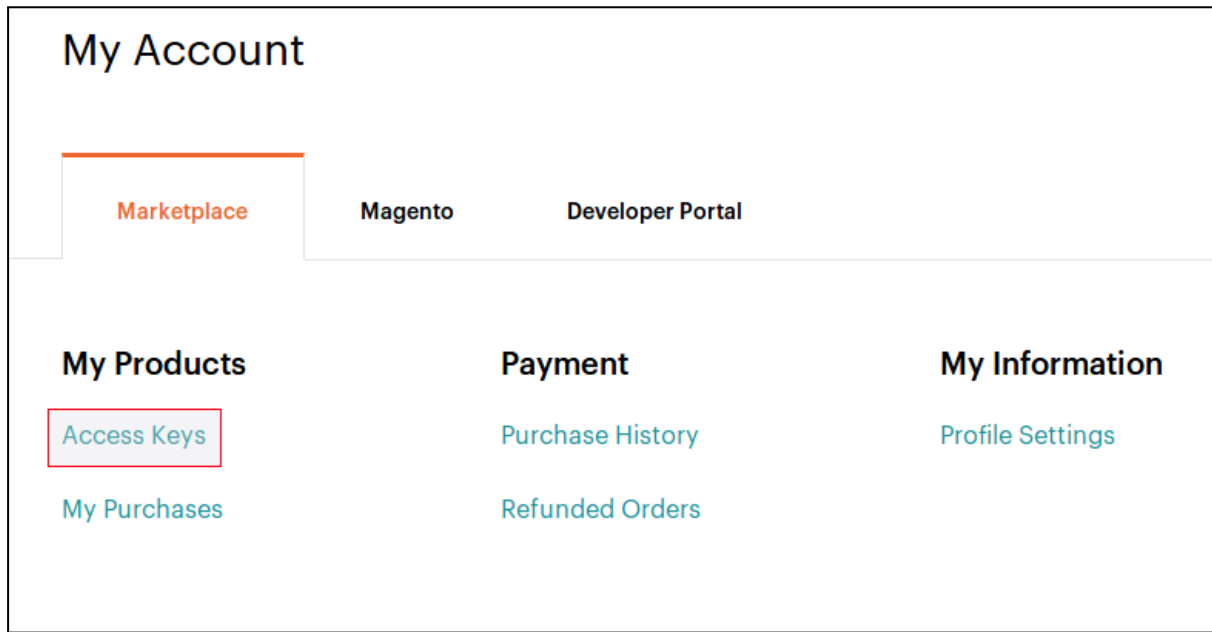

Use this command to change to developer mode:

```
php bin/magento deploy:mode:set developer
```

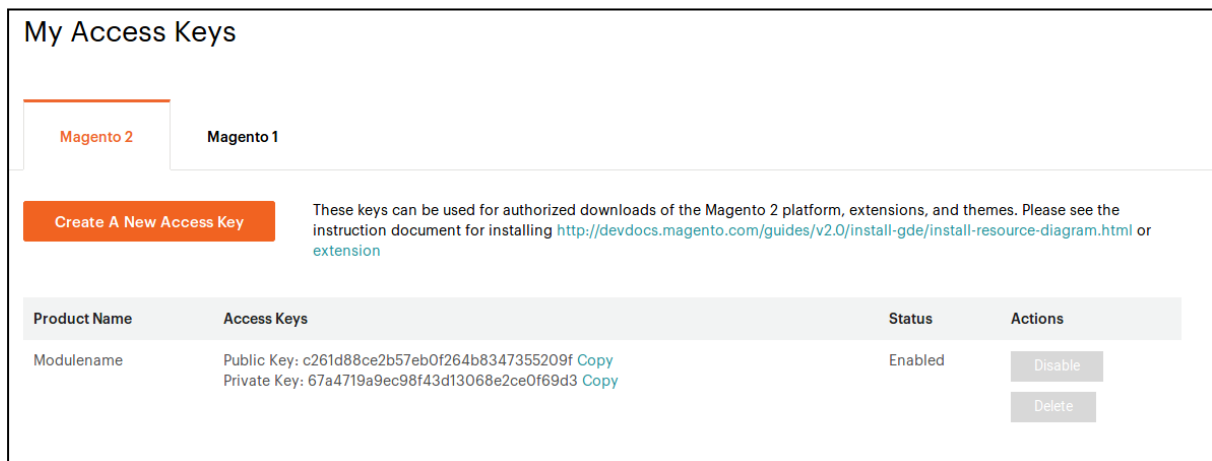

INSTALLATION STEPS

Install Using Web Wizard Setup:

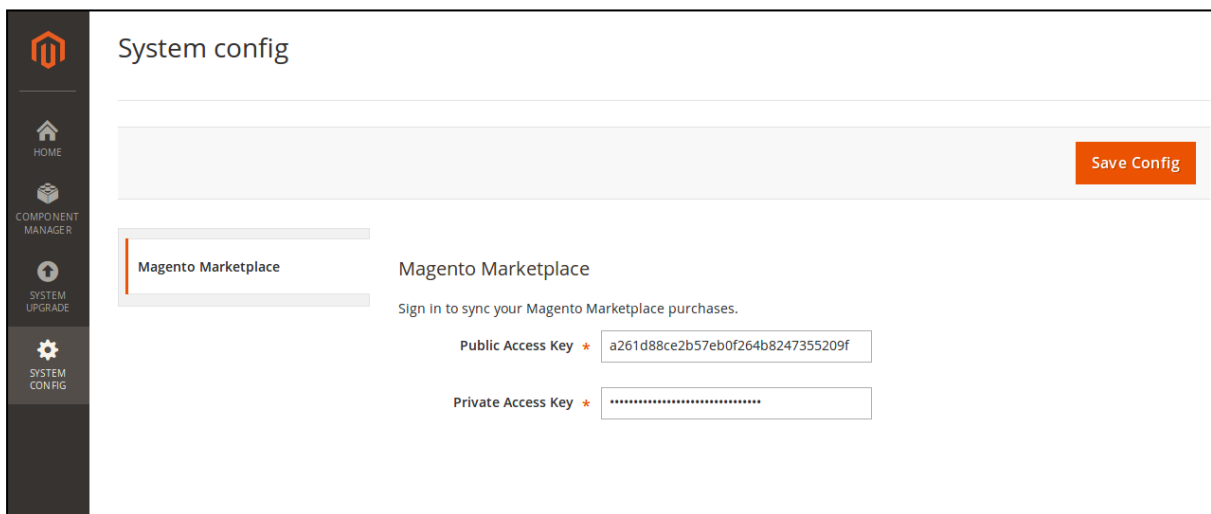

1. Purchase an extension from the Magento Marketplace.
2. Open the 'My Access Keys' page from "My Profile".

3. Click on the 'Access Keys' button and the keys will be generated automatically.

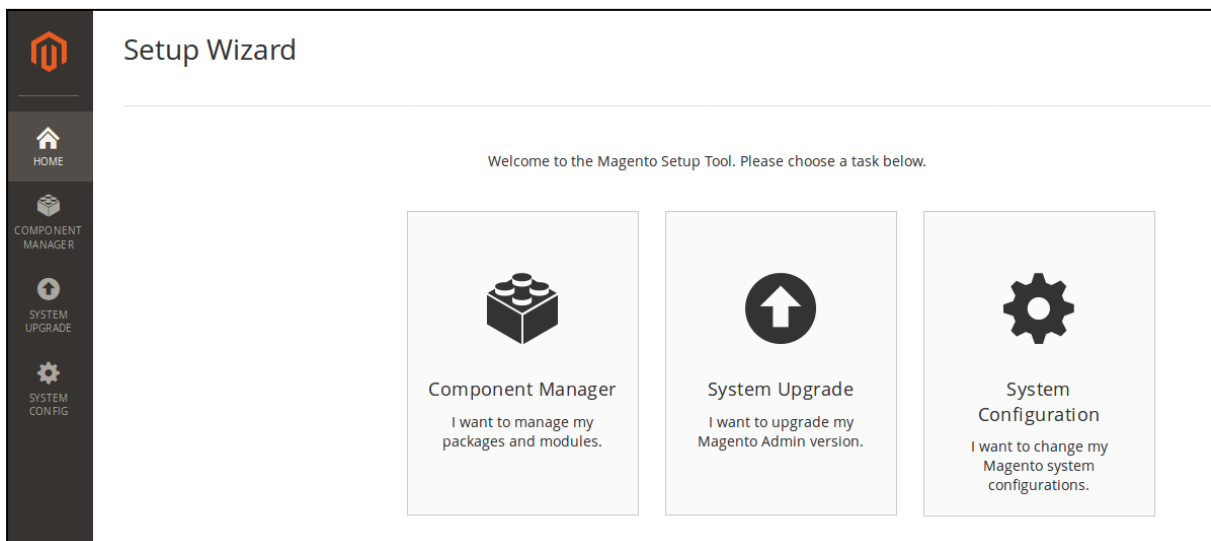

4. Log in to your Magento website, go to **SYSTEM** → **Tools** → **Web Setup Wizard** → **SYSTEM CONFIG** then **sign in** using generated keys.

The screenshot shows the 'System config' page in the Magento Admin interface. The left sidebar contains navigation icons for Home, Component Manager, System Upgrade, and System Config. The main content area is titled 'System config' and features a 'Save Config' button in the top right. Below this, the 'Magento Marketplace' section is active, displaying the text 'Sign in to sync your Magento Marketplace purchases.' There are two input fields: 'Public Access Key *' with the value 'a261d88ce2b57eb0f264b8247355209f' and 'Private Access Key *' which is masked with dots.

5. Click on the 'Component Manager'.

The screenshot shows the 'Setup Wizard' page in the Magento Admin interface. The left sidebar contains navigation icons for Home, Component Manager, System Upgrade, and System Config. The main content area is titled 'Setup Wizard' and features a welcome message: 'Welcome to the Magento Setup Tool. Please choose a task below.' There are three large buttons with icons and text: 'Component Manager' (with a brick icon) with the text 'I want to manage my packages and modules.', 'System Upgrade' (with an upward arrow icon) with the text 'I want to upgrade my Magento Admin version.', and 'System Configuration' (with a gear icon) with the text 'I want to change my Magento system configurations.'

6. Press the **'Sync'** button and then install available extensions.

The screenshot shows the 'Component Manager' interface. At the top, it displays 'Magento Marketplace Account' with a 'Reset' link. Below this, it shows 'New Updates: 135' and 'New Purchases: 5' with an 'Install' link. The 'Last Sync' was at 12:30:03 PM on Aug 31, 2017, with a 'Sync' button. A table below lists 148 records found, with 20 per page. The table has columns for Component Name, Module Name, Version, Type, Vendor, and Actions.

Component Name	Module Name	Version	Type	Vendor	Actions
magento/framework		100.1.6	library	magento	Select
magento/language-de_de		100.1.1	language	magento	Select
magento/language-en_us		100.1.1	language	magento	Select
magento/language-es_es		100.1.1	language	magento	Select

7. Select the following extension packages and click **'Install'**.

a. **magebees/module-urlrewrite**

The screenshot shows the 'Extensions Grid' interface. It displays '1 records found' and a table with columns for Extension Name, Metapackage, Version, Type, Vendor, and Action. The 'magebees/module' extension is selected, and the 'Install' button is visible.

Extension Name	Metapackage	Version	Type	Vendor	Action
magebees/module		1.0.0	magento2-module	magebees	Install

8. Run readiness check.

The screenshot shows the 'New Purchases' interface. It displays a progress bar with three steps: 'Readiness Check', 'Create Backup', and 'Component Install'. The 'Readiness Check' step is currently active. Below the progress bar, it says 'Step 1: Readiness Check' and 'Let's check your environment for the correct PHP version, PHP extensions, file permissions and compatibility.' There is a 'Start Readiness Check' button.

Import Export URL Rewrites Extension for Magento2 By MageBees

9. Create Backup

New Purchases

1 Readiness Check 2 **Create Backup** 3 Component Install

Back Next

Step 2: Create Backup

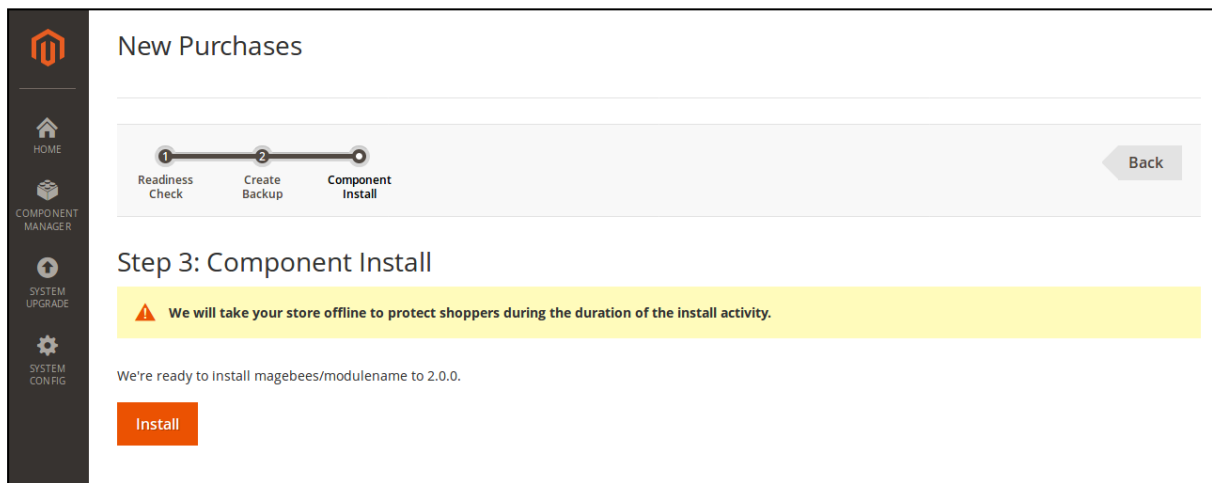

Backup Options

- Code
- Media
- Database

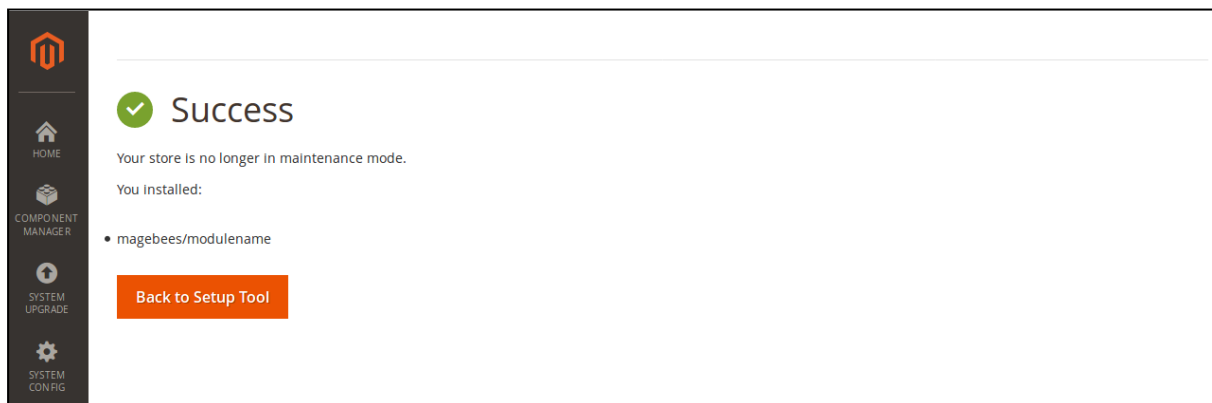

Let's check your disk space availability for taking selected backups, and then create the backups.

Create Backup

10. Install the extension. The installation process takes a couple of minutes.

11. After the installation is complete, you'll see the success page.

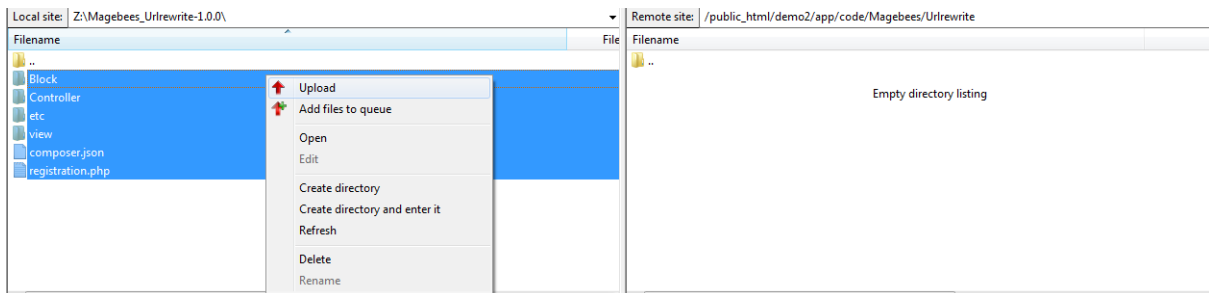

Manually Installation:

Step-1

- ⇒ Unpack the contents of the “**Magebees_Urlrewrite-1.0.0.zip**” folder that you have downloaded.

Step-2

- ⇒ Create “**Magebees**” folder in your <magento root directory>/app/code directory, if “**Magebees**” Folder not exist.
- ⇒ Create “**Urlrewrite**” folder in your <magento root directory>/app/code/Magebees directory.
- ⇒ Select the content of “**Magebees_Urlrewrite**” folder in your <magento directory>/app/code/Magebees/Urlrewrite directory and follow the below mentioned step.

- 1) Open command prompt /terminal and change directory to your magento install directory.
- 2) Run following command :

```
php bin/magento module:enable Magebees_Urlrewrite
```

```
php bin/magento setup:upgrade
```

```
php bin/magento setup:static-content:deploy
```

Step-3

- ⇒ Go to **Admin → SYSTEM → Tools → Cache Management**.
- ⇒ Select all caches, click on “**refresh**” from the drop down menu and submit the changes.
- ⇒ Once our extension installed then it will look like below screen.

Import Export URL Rewrites Extension for Magento2 By MageBees

The screenshot displays the Magento2 admin dashboard with the 'System' sidebar menu open. The 'MageBees - Import/Export URL Rewrites' option is highlighted with a red rectangular box. The sidebar menu includes categories like DASHBOARD, SALES, PRODUCTS, CUSTOMERS, MARKETING, CONTENT, REPORTS, STORES, SYSTEM, and FIND PARTNERS & EXTENSIONS. The main content area shows a 'Data Transfer' section with a 'Tools' dropdown and a 'Reload Data' button. Below this, there is a table with columns for 'Tax', 'Shipping', and 'Quantity', showing values of '\$0.00', '\$0.00', and '0' respectively. There are also buttons for 'Most Viewed Products', 'New Customers', and 'Customers'.
