HOW TO INSTALL?

Pre-installation:

- ⇒ Login to admin → System → Cache Management and **disable** all types of cache.
- ⇒ Go to System → Tools → Compilation and “**Compilation Status**” must be “**Disabled**”.

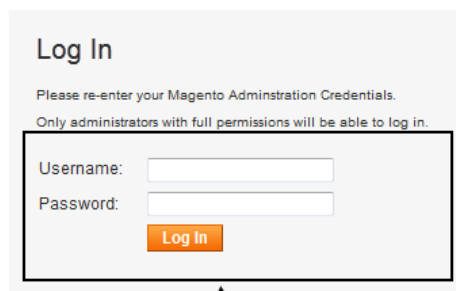

Using Magento Connect:

Step-1

- ⇒ Go to admin → System → Magento Connect → Magento Connect Manager.
- ⇒ You will get following screen. Enter your Username and Password here then, click on the login.

Magentoconnect MANAGER

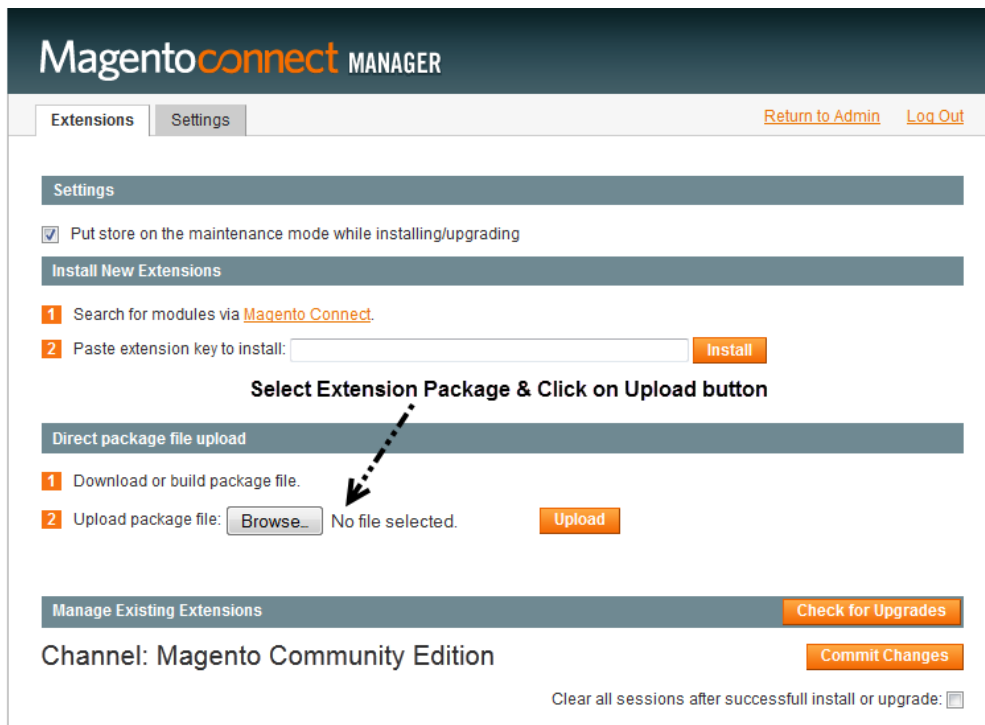

The screenshot shows a 'Log In' form with the following text: 'Please re-enter your Magento Administration Credentials.' and 'Only administrators with full permissions will be able to log in.' Below this, there are two input fields: 'Username:' and 'Password:'. An orange 'Log In' button is positioned below the password field. A dashed arrow points from the text below to the 'Log In' button.

Login here using your Admin Panel Username and Password.

Step-2

- ⇒ You will get following screen. Select the package using **Browse** button and click on the **Upload** Button.

The screenshot shows the Magento Connect Manager interface. At the top, there are tabs for 'Extensions' and 'Settings', and links for 'Return to Admin' and 'Log Out'. Below the tabs, there is a 'Settings' section with a checkbox for 'Put store on the maintenance mode while installing/upgrading'. The main section is 'Install New Extensions', which includes a search bar and an 'Install' button. Below this, there is a section for 'Direct package file upload' with a 'Browse...' button and an 'Upload' button. A dashed arrow points to the 'Browse...' button with the text 'Select Extension Package & Click on Upload button'. At the bottom, there is a 'Manage Existing Extensions' section with a 'Check for Upgrades' button and a 'Commit Changes' button. The channel is set to 'Magento Community Edition'.

After successfully extension installation. It will show below screen.

```
Auto-scroll console contents
Package installed:
community Namespace_Modulename X.XX
Cleaning cache
*****
Cache cleaned successfully
```

Procedure completed. Please check the output frame for useful information and refresh the page to see changes.

Refresh

Step-3

- ⇒ Log out from admin panel and re-login.

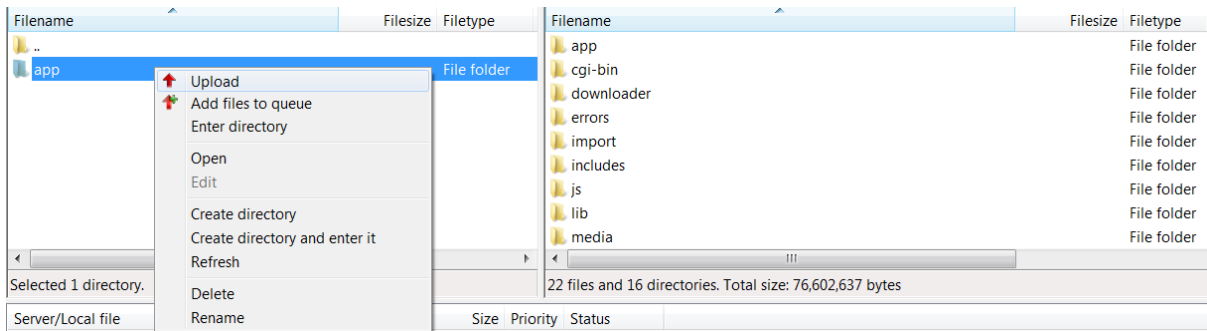

Products Data Migration From M1 to M2 By MageBees

Manually Installation:

Step-1

- ⇒ Unpack the contents of the “**products_data_migration_from_m1_to_m2-X.X.X.tgz**” folder that you have downloaded. (E.g. with the Freeware program *WinRAR*) in a directory of your choice.

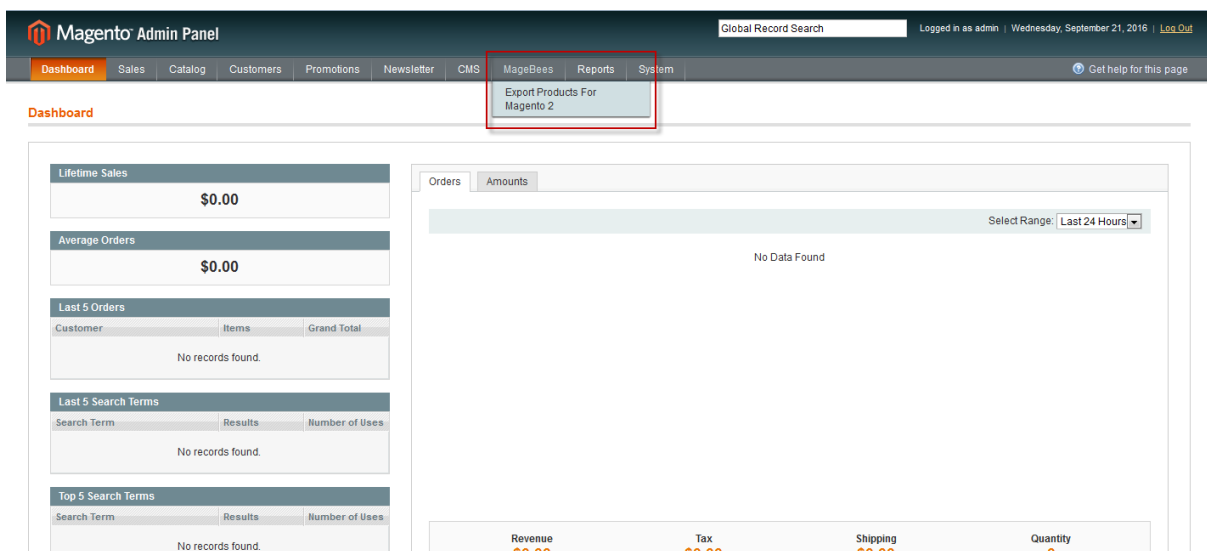

Step-2

- ⇒ Please upload “**app**” folder to your <SITE ROOT>

Note: After installed the Extension. Please Logout from admin account and Re-login.

After successfully installation you can see “**MageBees → Export Products For Magento 2**” menu in admin menu bar. Once our extension installed then it will look like below screen.

Thank you!
