PRE-INSTALLTION

Go to **Admin → SYSTEM → Tools → Cache Management**, select all caches, click "**Disable**" from the drop down menu and submit the changes.

	Cache Type	Description	Tags	Status
☐	Configuration	Various XML configurations that were collected across modules and merged	CONFIG	DISABLED
☐	Layouts	Layout building instructions	LAYOUT_GENERAL_CACHE_TAG	DISABLED
☐	Blocks HTML output	Page blocks HTML	BLOCK_HTML	DISABLED
☐	Collections Data	Collection data files	COLLECTION_DATA	DISABLED
☐	Reflection Data	API interfaces reflection data	REFLECTION	DISABLED
☐	Database DDL operations	Results of DDL queries, such as describing tables or indexes	DB_DDL	DISABLED
☐	EAV types and attributes	Entity types declaration cache	EAV	DISABLED
☐	Customer Notification	Customer Notification	CUSTOMER_NOTIFICATION	DISABLED
☐	Page Cache	Full page caching	FPC	DISABLED
☐	Integrations Configuration	Integration configuration file	INTEGRATION	DISABLED
☐	Integrations API Configuration	Integrations API configuration file	INTEGRATION_API_CONFIG	DISABLED
☐	Translations	Translation files	TRANSLATE	DISABLED
☐	Web Services Configuration	REST and SOAP configurations, generated WSDL file	WEBSERVICE	DISABLED

You also should run the Magento in developer mode when you're extending or customizing it. You can use this command line to show current mode:

```
php bin/magento deploy:mode:show
```

Use this command to change to developer mode:

```
php bin/magento deploy:mode:set developer
```

Please refer below link for how to set magento mode.

http://devdocs.magento.com/guides/v2.2/config-guide/cli/config-cli-subcommands-mode.html

INSTALLATION STEPS

Purchase Module From MageBees:

- **Install Using Web Wizard Module Manager :**

1. Download Zip files from Magebees Account and Upload Files on Your Magento Server.

Step-1

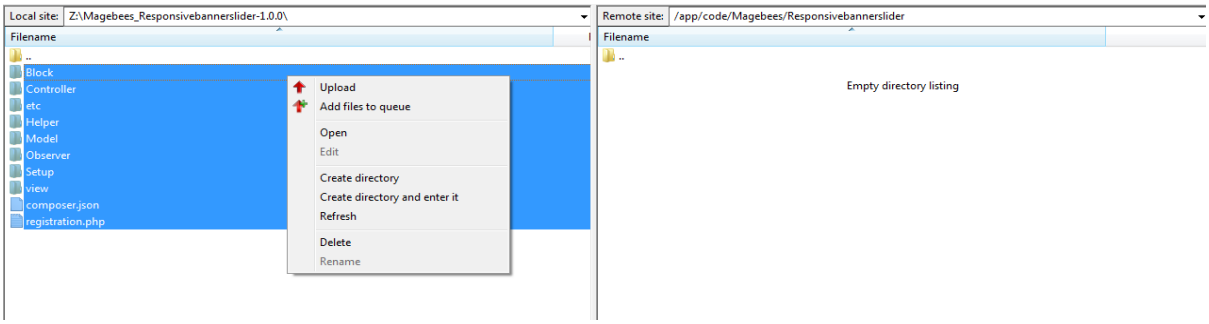
⇨ Unpack the contents of the "**Magebees_Responsivebannerslider.zip**" folder that you have downloaded.

Step-2

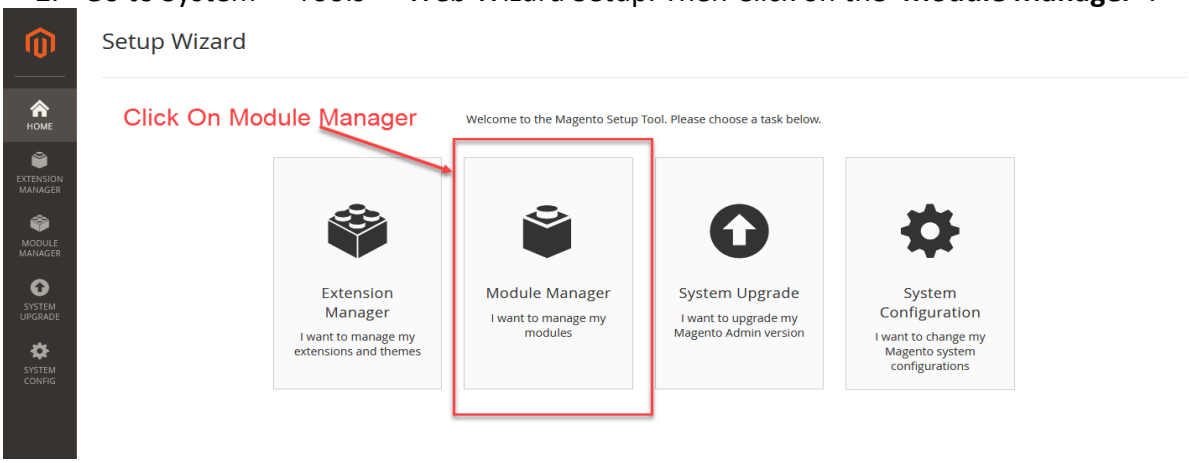
⇨ Create "**Magebees"** folder in your <**magento root directory>/app/code** directory, if "**Magebees"** Folder not exist.

⇨ Create "**Responsivebannerslider"** folder in your <**magento root directory>/app/code/Magebees** directory.

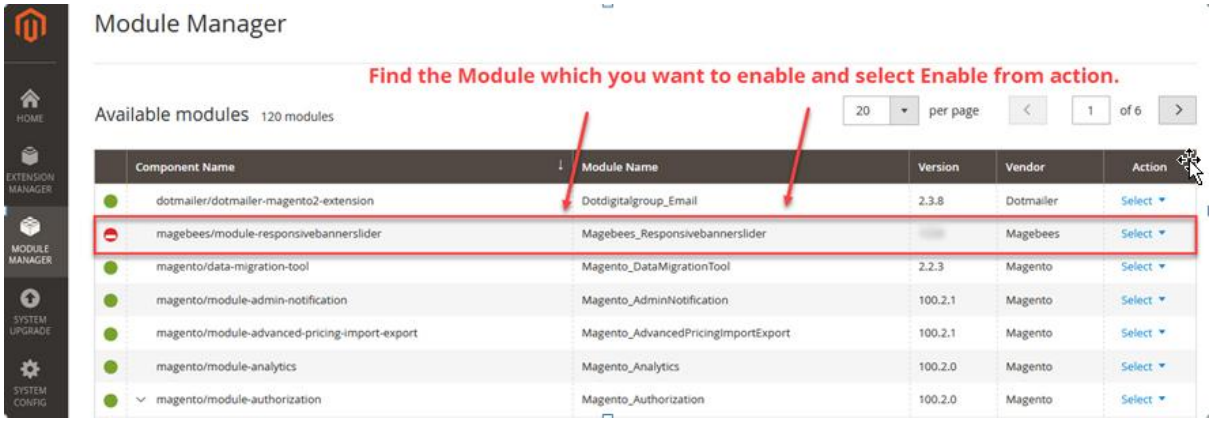
⇨ Select the content of **"Magebees_Responsivebannerslider"** folder in your **<magento directory>/app/code/Magebees/Responsivebannerslider** directory and follow the below mentioned step.



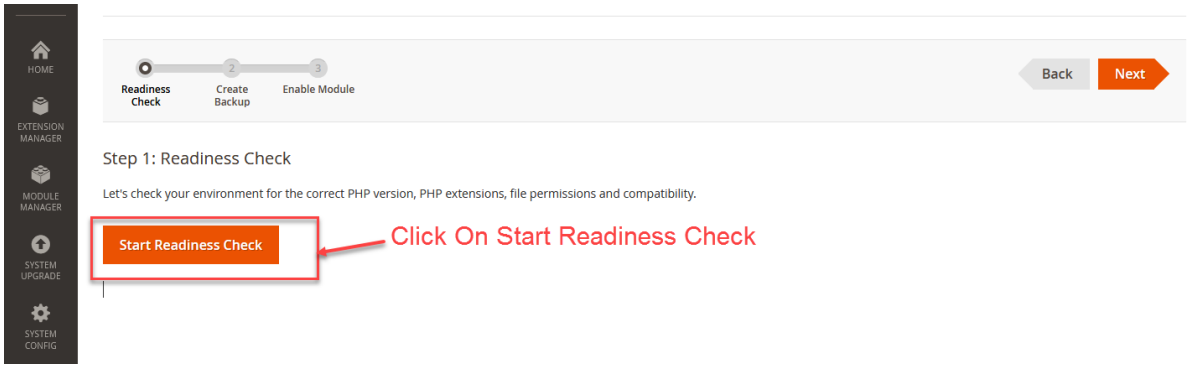
2. Go to System -> Tools -> Web Wizard Setup. Then Click on the '**Module Manager** '.



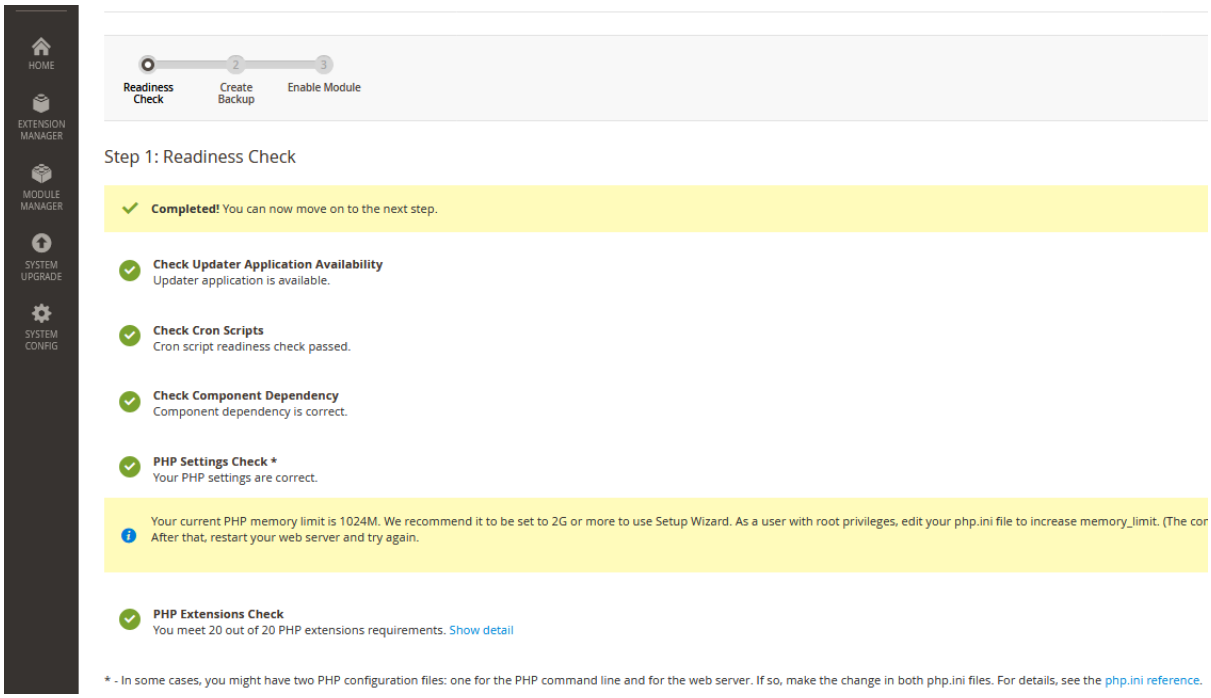
3. We will go to Module Manager Page. Here all available modules listed. Using Action drop-down we will enable and disable module.



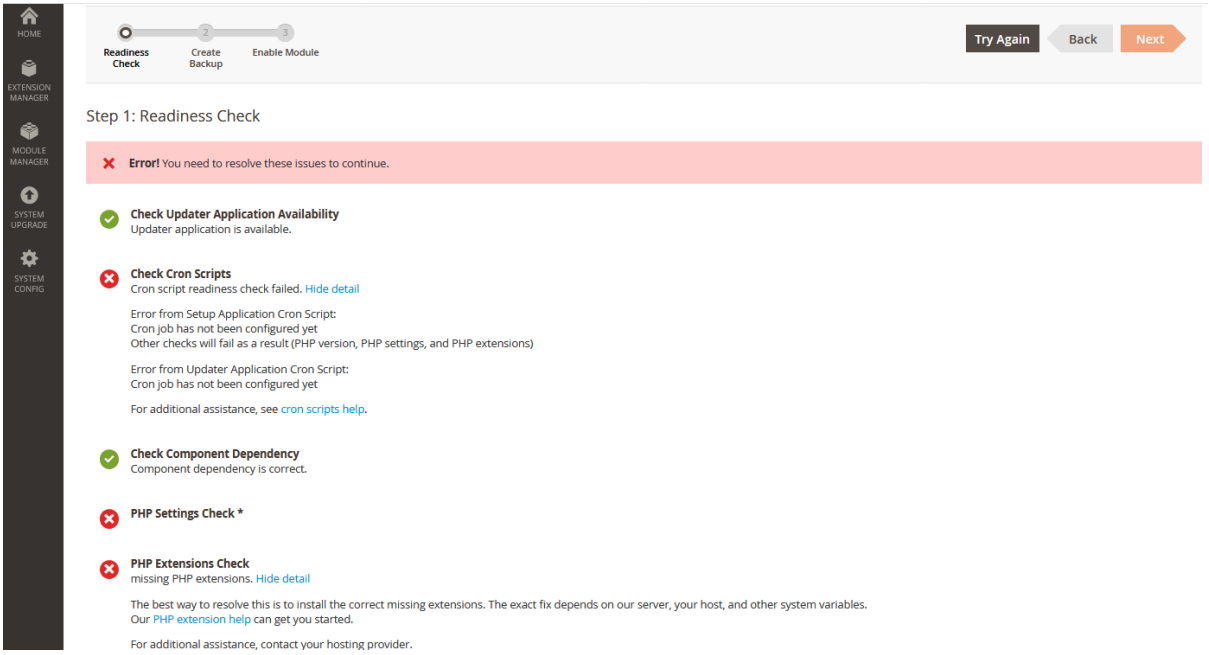
4. Run readiness check.



Readiness Check Success:



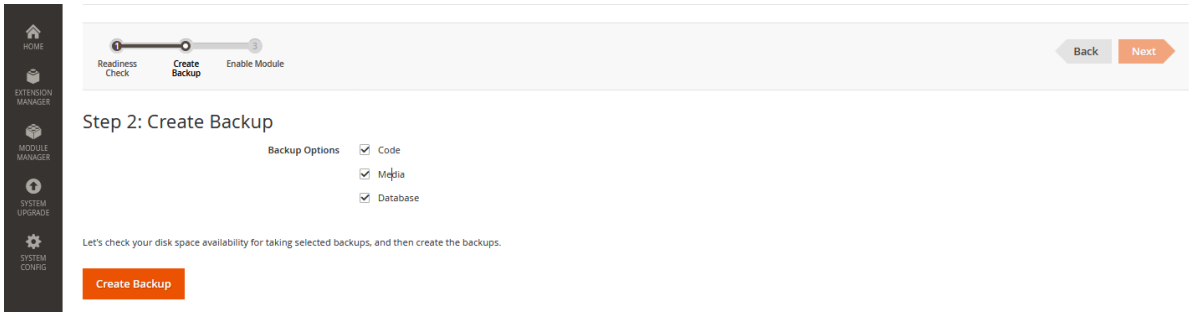
Readiness Check Failure:



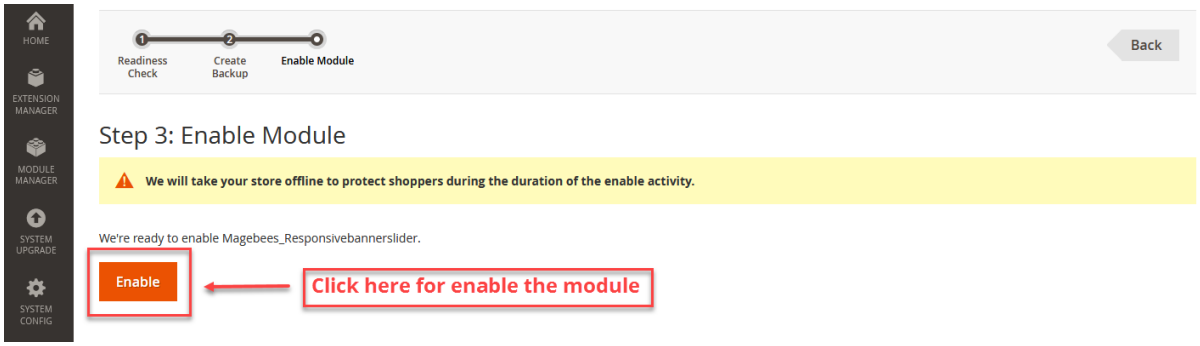
1. *Please check your system configuration with magento stack technology requirements.*
   http://devdocs.magento.com/guides/v2.2/install-gde/system-requirements-tech.html

2. *Please make sure you have configured cron job for magento properly.*
   Here you'll find the information on how to set up the cron job for Magento.

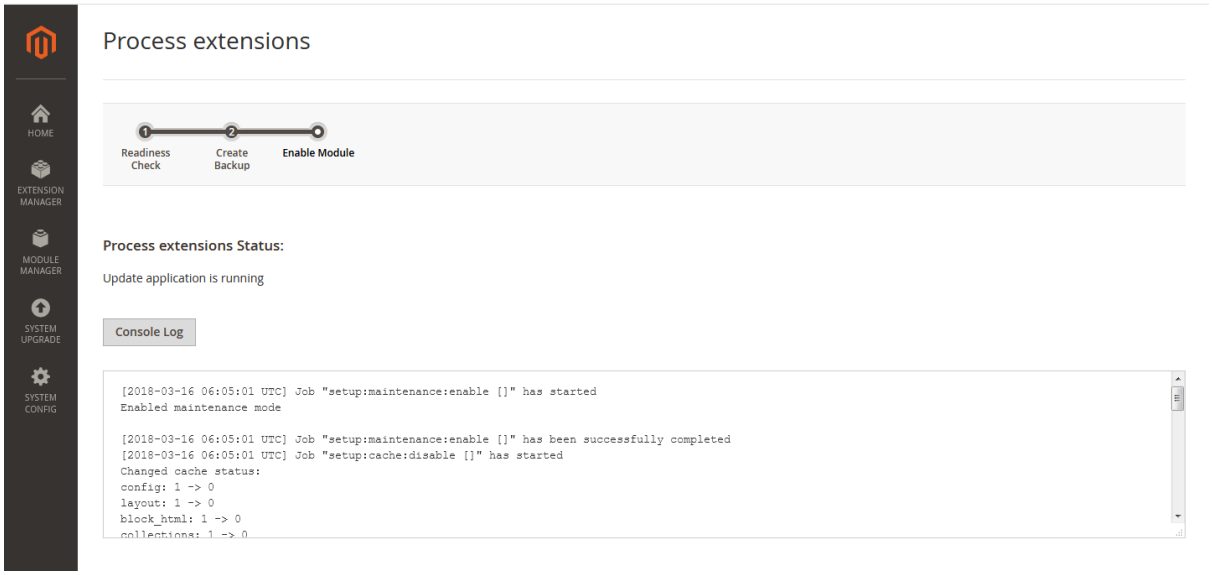
5. Create back up: if you want to take Backup before install module then select back up option.



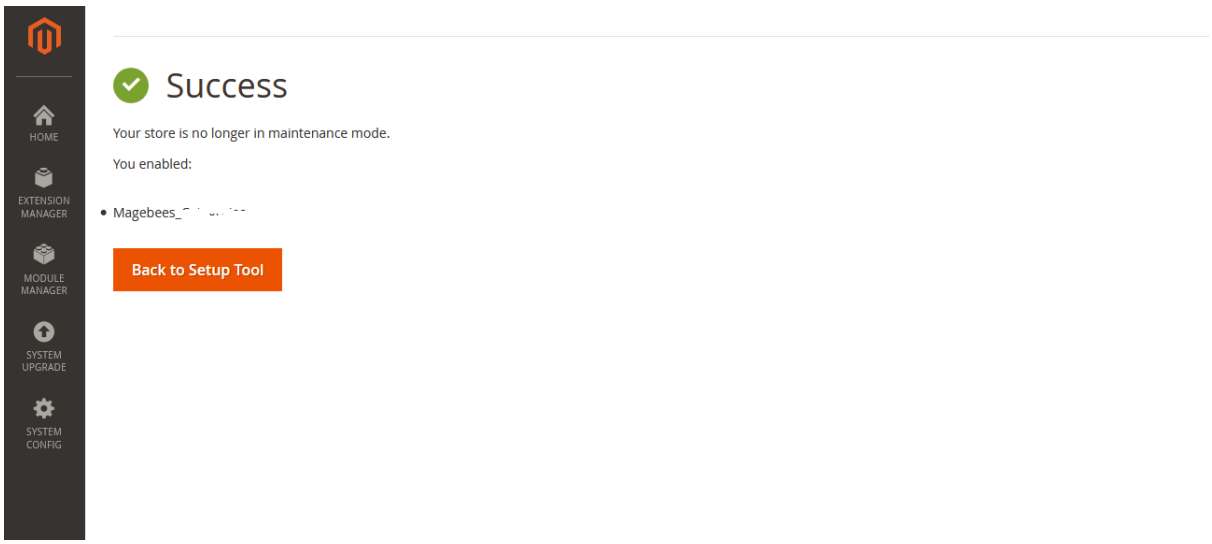
6. Enable the module. The installation process takes a couple of minutes.



When you click on Enable module then it will redirect to process extensions section.



7. After the installation is complete, you'll see the success page.



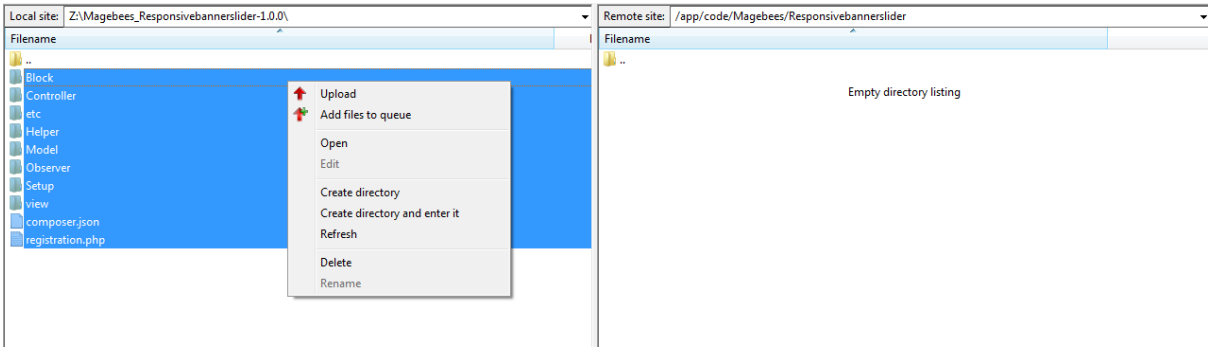
Install Using SSH:

Step-1

- ⇨ Unpack the contents of the "**Magebees_Responsivebannerslider.zip**" folder that you have downloaded.

Step-2

- ⇨ Create "**Magebees"** folder in your <**magento root directory>/app/code** directory, if "**Magebees"** Folder not exist.
- ⇨ Create "**Responsivebannerslider"** folder in your <**magento root directory>/app/code/Magebees** directory.
- ⇨ Select the content of **"Magebees_Responsivebannerslider"** folder in your **<magento directory>/app/code/Magebees/Responsivebannerslider** directory and follow the below mentioned step.



1) Open command prompt /terminal and change directory to your magento install directory.
2) Run following command :

```
php bin/magento module:enable Magebees_Responsivebannerslider
```

```
php bin/magento setup:upgrade
```

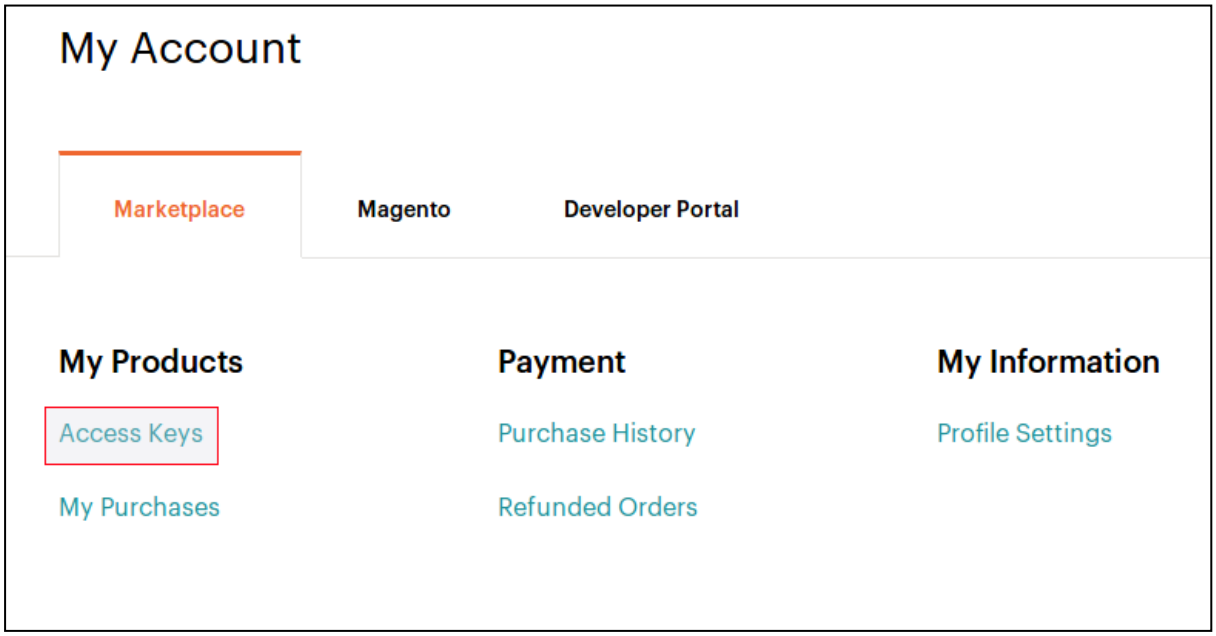
```
php bin/magento setup:static-content:deploy
```

Step-3

- ⇨ Go to **Admin → SYSTEM → Tools → Cache Management**.
- ⇨ Select all caches, click on "**refresh**" from the drop down menu and submit the changes.

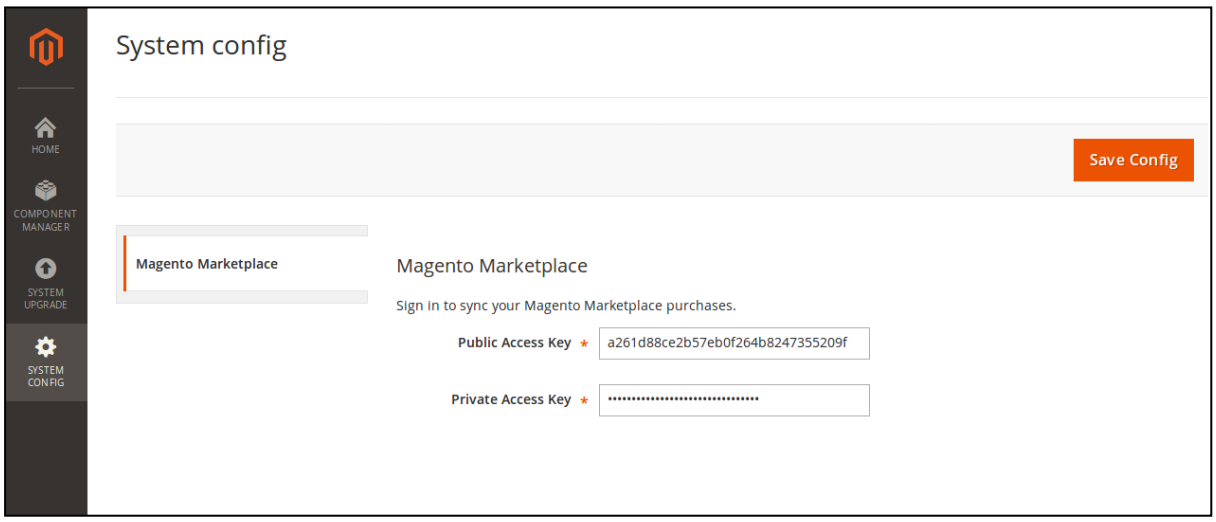
Purchase Module Using Magento Market Place:

1. Purchase an extension from the Magento Marketplace.
2. Open the '**My Access Keys**' page from "**My Profile**".

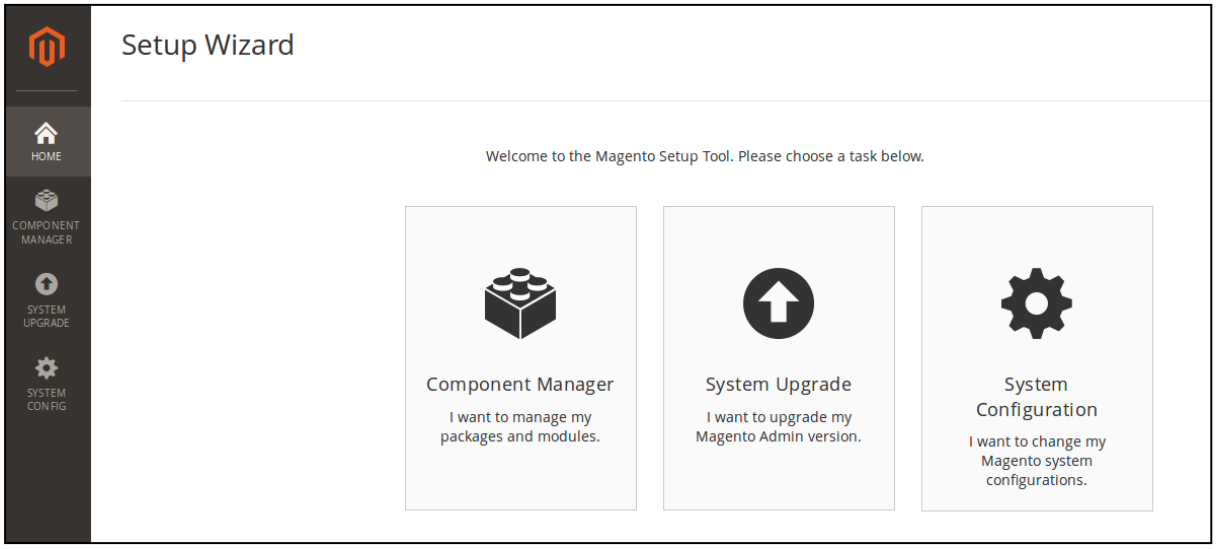


3. Click on the '**Access Keys**' button and the keys will be generated automatically.

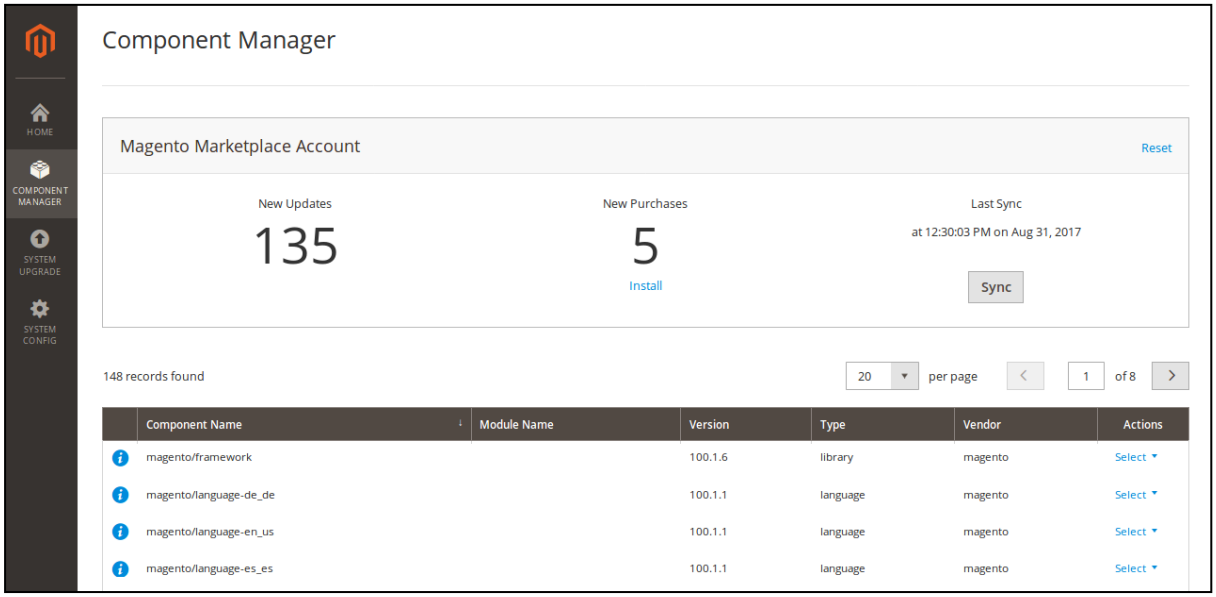
4. Log in to your Magento website, go to **SYSTEM → Tools → Web Setup Wizard → SYSTEM CONFIG** then **sign in** using generated keys.



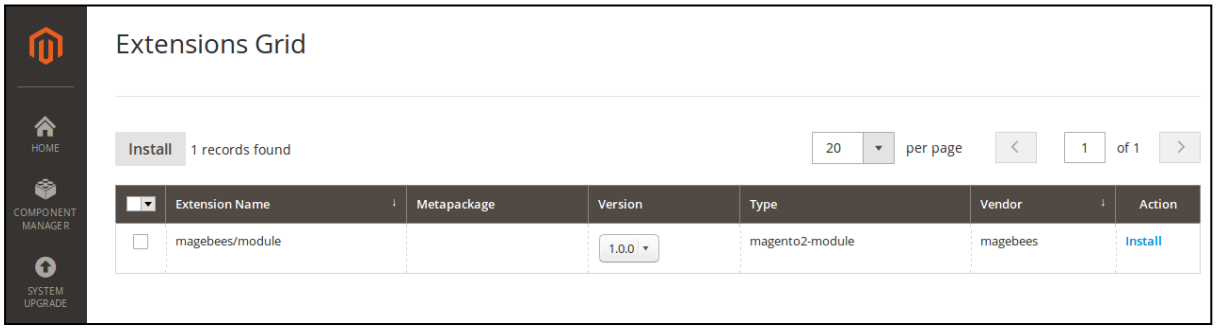
5. Click on the '**Component Manager** '.



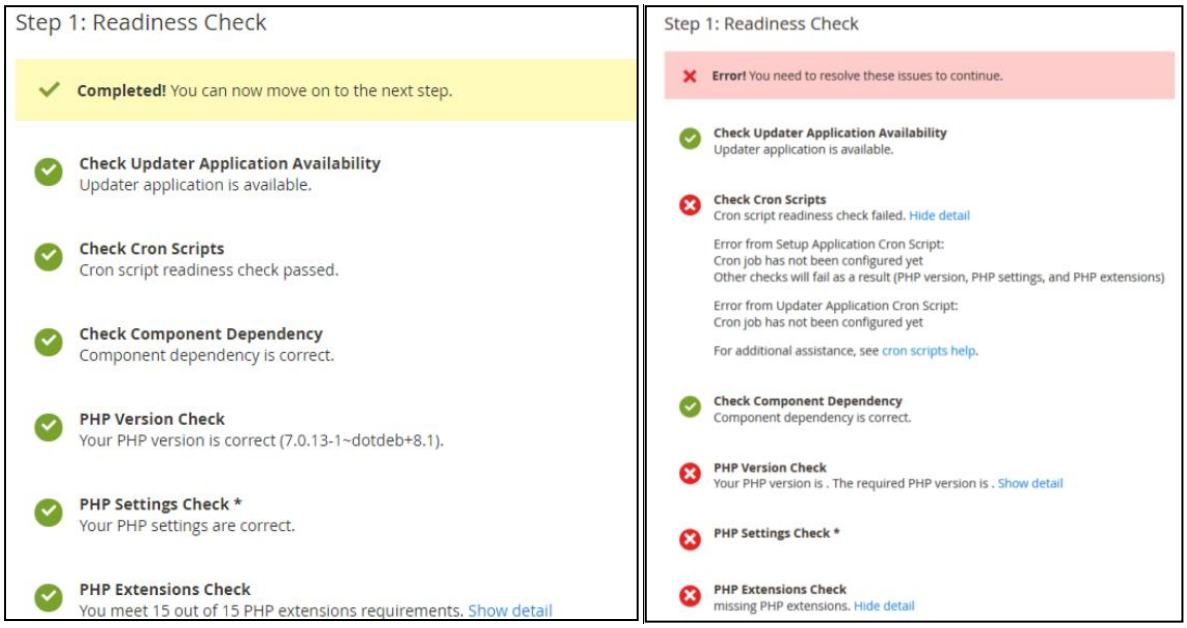
6. Press the '**Sync**' button and then install available Component.



7. Select the following extension packages and click '**Install**'.
   a. **magebees/module-responsivebannerslider**



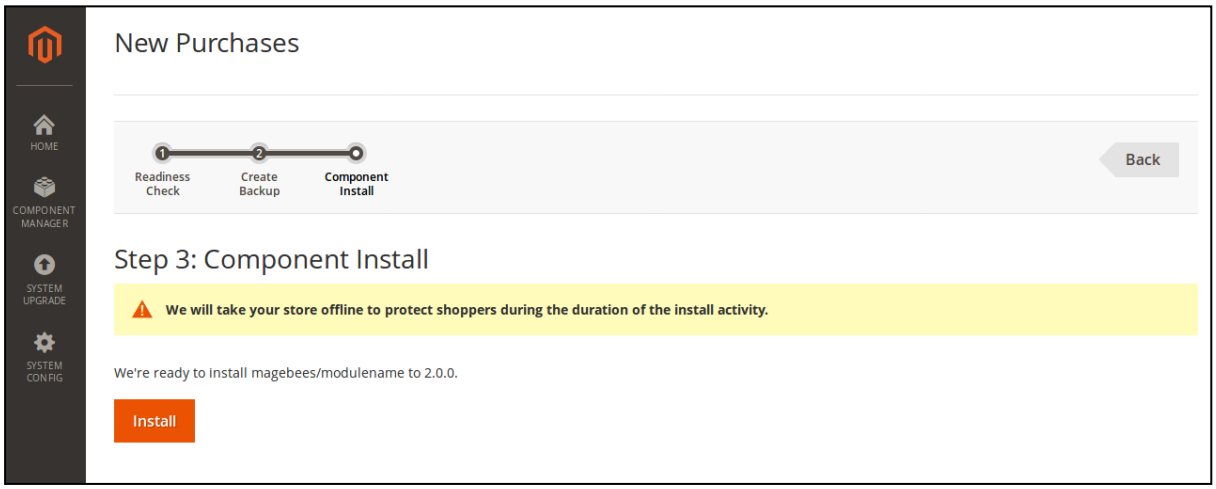
8. Run readiness check.



NOTE: During the readiness check process if you find the above errors, please make sure you've configured the cron job for Magento properly. Here you'll find the information on how to set up the cron job for Magento.

9. Create Backup

10. Install the Component. The installation process takes a couple of minutes.



11. After the installation is complete, you'll see the success page.
