You also should run the Magento in developer mode when you're extending or customizing it. You can use this command line to show current mode:

```
php bin/magento deploy:mode:show
```

Use this command to change to developer mode:

```
php bin/magento deploy:mode:set developer
```

INSTALLATION STEPS

Install Using Web Wizard Setup:

1. Purchase an extension from the Magento Marketplace.
2. Open the 'My Access Keys' page from "My Profile".

My Account

Marketplace Magento Developer Portal

My Products **Payment** **My Information**

Access Keys Purchase History Profile Settings

My Purchases Refunded Orders

3. Click on the 'Access Keys' button and the keys will be generated automatically.

My Access Keys

Magento 2 Magento 1

Create A New Access Key

These keys can be used for authorized downloads of the Magento 2 platform, extensions, and themes. Please see the instruction document for installing <http://devdocs.magento.com/guides/v2.0/install-gde/install-resource-diagram.html> or extension

Product Name	Access Keys	Status	Actions
Modulename	Public Key: c261d88ce2b57eb0f264b8347355209f Copy Private Key: 67a4719a9ec98f43d13068e2ce0f69d3 Copy	Enabled	Disable Delete

4. Log in to your Magento website, go to **System** → **Tools** → **Web Setup Wizard** → **SYSTEM CONFIG** then sign in using generated keys.

The screenshot shows the 'System config' page in Magento. On the left is a sidebar with navigation icons for Home, Component Manager, System Upgrade, and System Config. The main content area is titled 'System config' and features a 'Save Config' button in the top right. Below this is the 'Magento Marketplace' section, which includes the heading 'Magento Marketplace' and the instruction 'Sign in to sync your Magento Marketplace purchases.' There are two input fields: 'Public Access Key' with the value 'a261d88ce2b57eb0f264b8247355209f' and 'Private Access Key' which is masked with dots.

5. Click on the **'Component Manager'**.

The screenshot shows the 'Setup Wizard' page in Magento. The sidebar on the left is the same as in the previous screenshot. The main content area is titled 'Setup Wizard' and contains the text 'Welcome to the Magento Setup Tool. Please choose a task below.' Below this text are three large, light-colored boxes, each representing a different task. The first box is 'Component Manager' with a brick icon and the text 'I want to manage my packages and modules.' The second box is 'System Upgrade' with an upward arrow icon and the text 'I want to upgrade my Magento Admin version.' The third box is 'System Configuration' with a gear icon and the text 'I want to change my Magento system configurations.'

6. Press the **'Sync'** button and then install available extensions.

The screenshot shows the 'Component Manager' interface. At the top, there's a 'Magento Marketplace Account' summary with 'New Updates: 135', 'New Purchases: 5', and 'Last Sync: at 12:30:03 PM on Aug 31, 2017'. A 'Sync' button is visible. Below this, a table lists 148 records found, with the first few rows showing component names like 'magento/framework', 'magento/language-de_de', 'magento/language-en_us', and 'magento/language-es_es'.

Component Name	Module Name	Version	Type	Vendor	Actions
magento/framework		100.1.6	library	magento	Select
magento/language-de_de		100.1.1	language	magento	Select
magento/language-en_us		100.1.1	language	magento	Select
magento/language-es_es		100.1.1	language	magento	Select

7. Select the following extension packages and click 'Install'.

⇒ **magebees/module-todaydealproducts**

The screenshot shows the 'Extensions Grid' interface. It displays a table with one record: 'magebees/module' with version '1.0.0' and type 'magento2-module'. An 'Install' button is visible next to the record.

Extension Name	Metapackage	Version	Type	Vendor	Action
magebees/module		1.0.0	magento2-module	magebees	Install

8. Run readiness check.

The screenshot shows the 'New Purchases' interface. It features a progress bar with three steps: 'Readiness Check', 'Create Backup', and 'Component Install'. The 'Readiness Check' step is currently active. Below the progress bar, there's a 'Start Readiness Check' button.

Step 1: Readiness Check
Let's check your environment for the correct PHP version, PHP extensions, file permissions and compatibility.

Start Readiness Check

Today's Deal Products By MageBees

<p>Step 1: Readiness Check</p> <p>✓ Completed! 10. Install the extension. The installation process takes a couple of minutes.

The screenshot shows the 'New Purchases' section of the MageBees admin interface. A progress bar at the top indicates three steps: 1. Readiness Check, 2. Create Backup, and 3. Component Install. A 'Back' button is visible on the right. Below the progress bar, the heading 'Step 3: Component Install' is displayed. A yellow warning banner states: 'We will take your store offline to protect shoppers during the duration of the install activity.' Below this, a message reads: 'We're ready to Install magebees/modulename to 2.0.0.' An orange 'Install' button is positioned at the bottom of the main content area. The left sidebar contains navigation icons for Home, Component Manager, System Upgrade, and System Config.

11. After the installation is complete, you'll see the success page.

The screenshot shows the 'Success' page in the MageBees admin interface. A green checkmark icon is followed by the word 'Success'. Below this, a message states: 'Your store is no longer in maintenance mode.' Underneath, it says 'You installed:' followed by a list item: '• magebees/modulename'. An orange 'Back to Setup Tool' button is located at the bottom of the main content area. The left sidebar contains navigation icons for Home, Component Manager, System Upgrade, and System Config.
