You also should run the Magento in developer mode when you’re extending or customizing it. You can use this command line to show current mode:

```
php bin/magento deploy:mode:show
```

Use this command to change to developer mode:

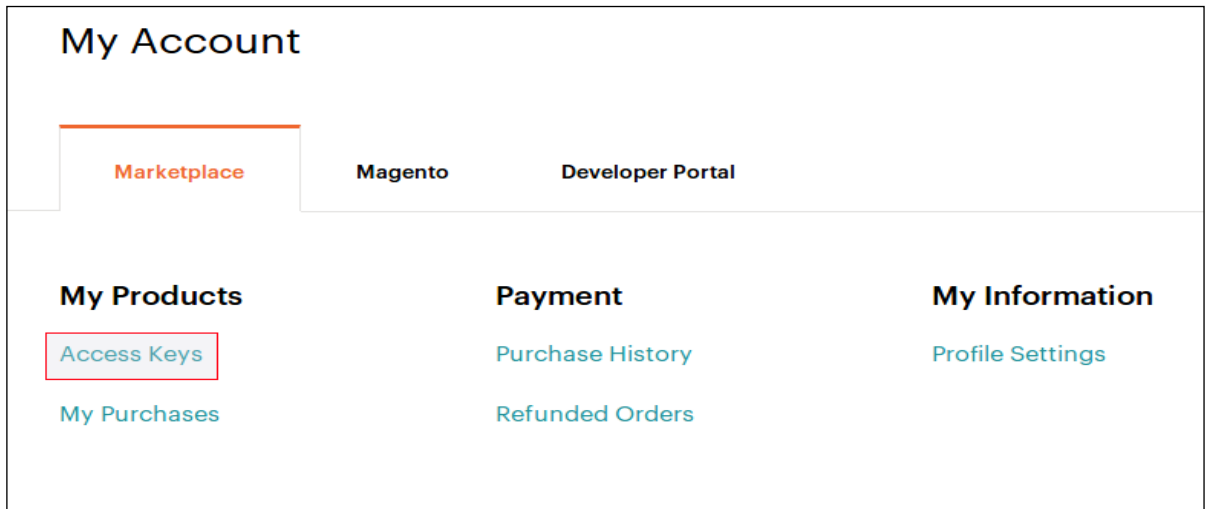

```
php bin/magento deploy:mode:set developer
```

## INSTALLATION STEPS:

### Install Using Web Wizard Setup:

1. Purchase an extension from the Magento Marketplace.
2. Open the 'My Access Keys' page from "My Profile".

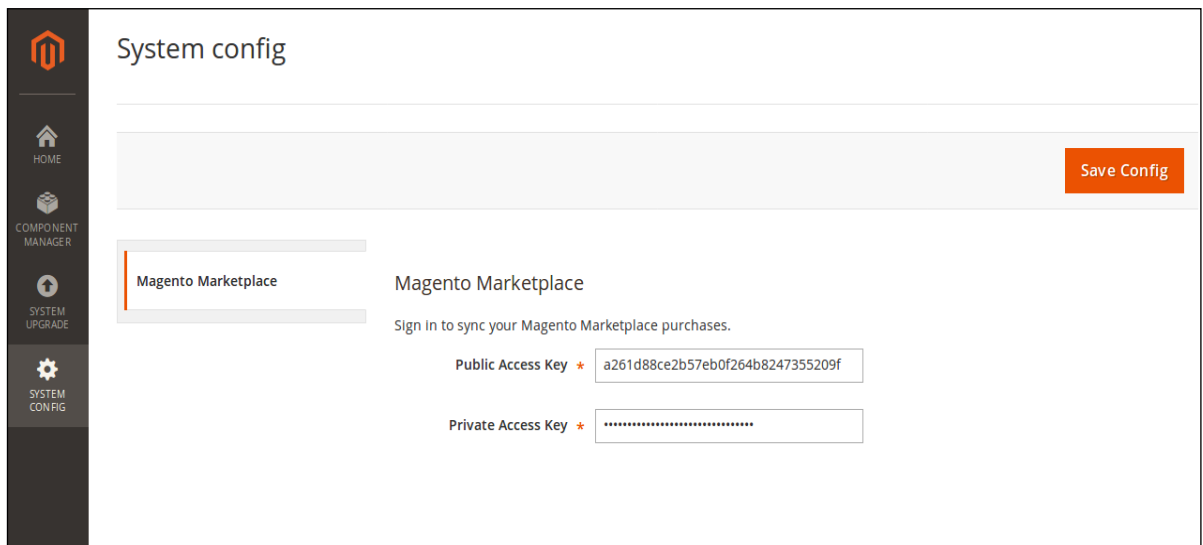

3. Click on the 'Access Key' button and the keys will be generated automatically.

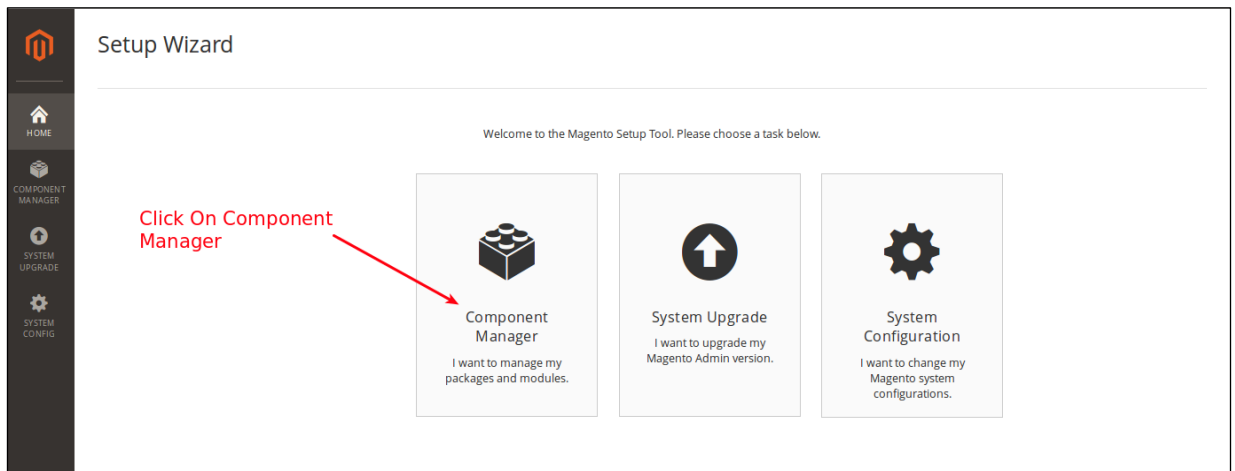

# Product Feed Generator For Magento 2 By MageBees

4. Log in to your Magento website, go to System → Web Setup Wizard → System Config then sign in using generated keys.

5. Click on the 'Component Manager'.

# Product Feed Generator For Magento 2 By MageBees

6. Press the 'Sync' button and then install available extensions.

The screenshot shows the 'Component Manager' interface. At the top, there's a 'Magento Marketplace Account' section with a 'Reset' link. Below this, three statistics are displayed: 'New Updates' (135), 'New Purchases' (5 with an 'Install' link), and 'Last Sync' (at 12:30:03 PM on Aug 31, 2017) with a 'Sync' button. A table below shows 148 records found, with a '20 per page' dropdown and '1 of 8' pagination. The table lists several components:

Component Name	Module Name	Version	Type	Vendor	Actions
magento/framework		100.1.6	library	magento	Select
magento/language-de_de		100.1.1	language	magento	Select
magento/language-en_us		100.1.1	language	magento	Select
magento/language-es_es		100.1.1	language	magento	Select

7. Select the following extension packages and click 'Install'.

→ Magebees/Productfeed

The screenshot shows the 'Extensions Grid' interface. It displays '1 records found' with an 'Install' button. A table below lists the extension:

Extension Name	Metapackage	Version	Type	Vendor	Action
magebees/module		1.0.0	magento2-module	magebees	Install

8. Run readiness check.

The screenshot shows the 'New Purchases' interface. It features a progress bar with three steps: 'Readiness Check', 'Create Backup', and 'Component Install'. The 'Readiness Check' step is currently active. Below the progress bar, there's a 'Start Readiness Check' button. The text below the button reads: 'Let's check your environment for the correct PHP version, PHP extensions, file permissions and compatibility.'
